BRIDGEPORT, Conn., Feb. 1.-Late yesterday afternoon, the three-masted schooner Glendon of St. John, N. Interesting History of the Great Weil and La Albra Claims Bill and the Revelations Brought Out in the Discussions-A Lively Week Promised.

WASHINGTON, Feb. 1.- A very interesting week is promised in the proceedings of the senate. At 30'clock this afternoon a health; July, ruby, corrects evils resulting vote will be taken on the Weil and from mistaken friendship and preserves LaAbra claims bill, and that much disfrom folly; August, sardonyx, a happy cussed measure, which has been the unconsumed in its deliberation would surber, topaz, prevents bad dreams, is pass in length that consumed by the Blair educational bill.

The names of these cases are probably more familiar than the facts. Circumstances disclosed in the discussion, would, Maximillian government, the Mexican authe mine, drove out his American assist-

Took Forcible Possession of the property. It was satisfactorily shown that the profits of the mine were about \$1,000,000 a year, and that at least \$1,000,000 in pay ore was lying on the dump when the Mexicans took possession. On this evidence, which was then unrefuted, Edward Thoraton, the British ambassador to the United States, who acted as Luther S. Bent,
Luther S. Bent, (U. S. Volunteers, by for \$750,000, and Mexico paid the money to

he state department. When about a quarter of this mouey had been distributed, somebody who did not think he was getting his full share obtained possession of the letter press copy books of the company kept at the mine and sold them to the Mexican government. These conclusively showed that the mine had never been seized at all, but that it had been voluntarily abandoned because the ore had been found to be so valueless that it did not pay the cost for smelting. The whole claim was shown to be a fabrication of the superintentent, who is now dead, inspired by the establishment of the mixed commission to consider claims of American and Mexican citizens against the governments of the two countries arising out of the war.

The Weil Claim had not even as much foundation as this. It was based on the allegation that a man named Benjamir Weil, who lived in New Orleans and was engaged in running cotton through Mexico during the war, had lost a heavy mue train and 700 bales of cotton, at the time when cotton was worth nearly 50 cents a pound, by being captured and taken possessan of by the Mexican Liberal force.

The proofs were complete. Sir Edward Thornton awarded aim about \$250,000 in compensation for his loss. Weil was mixed up in business with a number of other firms scattered over the south, who had agreed to pool their issues. Here again a quarrel over the disposition of the proceeds caused an examination to be made of the books and letters of the firm, and the fact was established that neither mules, wagons nor cotton had ever had existence, except in the minds of the men who supplied the testimony on which the

award was made. Seven hundred thousand dollars of the amount thus obtained in these two cases still remains undistributed, a special deposit in gold in the sub-treasury in New York. Four successive presidents have told congress that the national honor demands that this money should be re-funded to Mexico, but no action has yet been taken. The bill before the senate provides for a suit to be brought before the court of claims to declare the

Fraudulent Character of the Claims, so that the unexpended money can be paid back to Mexico. The indications are that it will pass the senate by unanimous vote Its progress in the house will be watched

with interest. A curious fact stated by Senator Morgan in the debate was that only a very few hundred dollars of the \$250,000 distributed under the award has reached the widow of Weil or the stockholders in the LaAbra Mining company. The rest has been absorbed by claim agents and attorneys.

A NEGLECTED STUDY,

Editors of Daily Ledger: The debate of the Clan McGregor Literary Society on "Women's Suffrage" which should have taken place on Saturday evening, had to be postponed owing to unforseen circumstances. Having thus no report to make today, I would like with the LEDGER to offer a few remarks on a branch of education which I think is much neglected by the mass of the people. I refer to the study of human anatomy and physiology. I am aware that this is taught to some extent in our schools, but I am afraid it is one of the studies which is almost entirely neglected later in life. There is probably no subject under the sun on which there is more popular ignorance results. When disease overtakes a man or woman and a doctor is called in, it is comparatively seldom that the patient is able As doctors are not omniscient we cannot mistaken diagnosis. Now if physiology

Among Democrats even more uncer- enough to dictate the policy and name ity of at least half a dozen great Democrats is daily discussed.

As we look down from the press gallery a large number of presidential possibilites come into view. First of all a presidential possibility, and without we pause to look at "grand old John Sherman," tall, thin, silent, preoccupied, well preserved. For thirty years a conspicuous public man and for fifteen years a candidate for the presidency, many still look upon him as a presidential possibility. But that is because front. In the Capitol men and women they do not know the truth. Senator flock to the senate chamber to see him Sherman told one of his colleagues a few He is one of the lions of the hour. days ago that he was forever done with the presidential ambition. "It has unsettled my life, distracted my attention | rule that power goes farther in Washfrom other matters, subjected me to annoyance as much as I can permit it to do," said the senator; "I have absolutely and forever put behind me the desire to be president, and I shall round out my career in the senate by serving the term to which I have just been elected, if providence spares my life so long, and then I shall retire to private life."

Near by is the well fed, well groomed, sleek and smooth Allison, of Iowa. He has been a candidate for the presidency, and in certain contingencies will be one again. He is an ideal senator-studious, ful to the body of which he is a member and to his con nts—his friends he would make an ideal president. Allison and Sherman are great friends. In the Chicago convention of 1888 the Iowa senator withdrew his name and requested his friends to rally to Sherman's support. If they had done so Sherman and not Harrison would have been nomi-

Another Republican possibility is Cullom, of Illinois. Cullom's state is likely to go into the convention asking his nomination. Four years ago he was kept in the background by the popularswer a few questions, but as it had evidently ity of Judge Gresham in Illinois, and while he did not like it very well he toted fair, as they say out in Illinois, and did what he could to bring about the nomination of the state's candidate. Now Gresham is not a candidate and Cullom is. Between the Illinois senator and President Harrison no great love exists, and I shouldn't be surprised to see Illinois as strongly against Harrison as it was four years ago, no matter whether first to simplify the grammar school system arraigned for keeping a liquor nuisance. Cullom makes headway as a candidate or not. I know Mr. Cullom very well, James Emmett for being a tramp at and he is one of the most charming of characters charged with insincerity and indirection who are at heart simple

It is that he has determined no other New York man shall be the Democratic candidate for president, and that if the support of the state of New York be essential to the success of another he has within his grasp the power to carry Loads of Gravel out his plans; that he and his friend Gorman understand each other thoroughly, and that if Hill cannot be nominated he will turn his following over to the Marylander.

Further runs the gossip that in the end the rivalries in New York will be used to show that it is not prudent to nominate any citizen of that state at this time, and hence Gorman must be Quarry of O. But not all Democrats subscribe to this view of the situation. Many there are who say the popularity of ex-President Cleveland among the masses of the party voters is so great that it will be necessary to nominate him whether the party leaders want him or not. These differences of opinion only whether the party leaders want him or go to show how uncertain is the game of politics, and what a lively year we are going to have of it in this land of ours. In the rear row of seats we see a white haired old man with a ruddy face and the vigorous manners of a man of fifty. He is General John M. RUSSIA'S HUNGRY PEASANTS.

Minister Smith Makes an Official Annonncement of His Observations. Washington, Feb. 2.-The department of state has received from Minister Smith, at St. Petersburg, an interesting report of the actual conditions of the stricken districts of Russia, prepared from evidence of eye-witnesses and most trustworthy sources. The territory afflicted by the famine comprises thirteen provinces of European Russia. In five other provinces the famine prevails in part, and one or two others Germany, and the population is about 27,-000,000. The destitution is not universal, however. An official estimate of the number of those without food or means of support who require aid is given as 14,000,-000 persons, and this is probably below the

important factor in the work of relief. Every week is vital. One hundred and eight million pounds of food are necessary. Fifty carloads should arrive every day in these stricken provinces. The emergency pending has not been realized, unfortunately, but the spectre of the famine has overshadowed everything, and every will be held this evening. It will not be a work of relief. But the work must still

Fog-Brave Life-Savers Rescue All the Passengers-Accident Close to the Spot Where a Great Disaster Occurred.

Off the Isle of Wight During a Dense

LONDON, Feb. 2.—The steamship Eider, of the North German Lloyd Steamship company, Captain Heincke, which left New York for Bremen on Jan. 23, went ashore at 10 o'clock Sunday night on the Field rocks, nine miles west of Ventnor, Isle of Wight. A heavy fog prevailed at the time, and the captain of the Eider had calculated that the vessel was a few miles westward of The Needles, a cluster of three rocks to the west of the Isle of Wight. The steamer struck just as the lead was being heaved. Soundings taken only five miffutes previously had indicated ten fathoms of water. Neither The Needles light nor the St. Catherines light was visible when the Eider struck the

reef. She had 300 passengers aboard. The men in charge of St. Catherines light say the fog siren was in full operation at the time, and was blowing all during the four hours the fog lasted, and that the electric, with which the St. Catherines is furnished, was burning at its fullest power. The Eider was

The passengers were somewhat startled when the steamer first went on the ledge, but they were soon reassured by the news that there was no danger. among the passengers, and no alarm pre-

and that assistance was near at hand if it was needed. Among the officers and crew military calmness and discipline prevailed. An examination showed there was but little water in the wells and the vessel did not appear to be damaged. It was decided to jettison part of her cargo and fifty-seven bales of cotton were thrown overboard. Ropes were attached to the bales and tied to the railing of the ship so that the ship 1.15 and 4.25 P. M.

then rising, accompanied by rainstorm, he Signalled to the Shore for Help. The vessel had listed slightly to port as the tide receded. Although she appears to be close to the shore, it was found impossible to reach her by double rockets. As the tide ebbed the wind fell: three life-boats were again launched, and as soon as they reached the ship they began the work of rescue, landing as rapidly as possible full boatloads of passengers. Besides the hotels a number of cottages were placed at The resolutions were adopted.

the disposal of the passengers, and there all made comfortable. At 10 o'clock last evening all the passengers and mails had been landed. The last boatload of passengers reached shore amid the rejoicing of a large crowd on the beach. The saving crews received an ovation. By nightfall 166 to 170 Washington St., six tugs had arrived and were awaiting attempt to tow the vessel off.

the attempt to tow the steamer off. The Landing of Passengers by the lifeboats became somewhat risky after 8 o'clock when the wind, which was blowing dead ashore, freshened considerably and threatened to increase to a gale. The vessel carried \$300,000 in specie. The captain ordered the bags' containing the money to be piled on the deck on the side of the vessel facing the shore. The big heap of money was so arranged as to be ready immediately, should the necessity arise, to be sunk in a safe place among the rocks, whence it could afterward be easily re-covered by divers. An attempt was made to get the Eider afloat with her own power. The screw churned the water at a great rate but the steamer remained fast.

Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfectly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is strictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all diseases of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

> An Average Man. A realistic story Without any gush or glory, With no sentimental limelight And no firework display, Bout a poor old ignoramus Who was never rich nor famous, And who couldn't ignite the river,

And who worked out by the day. A very common feller Was this Ebenezer Weller, With the usual share of virtues And with vices two or three; He'd no fatal gift of beauty, But an average sense of duty, Neither very good nor evil— Just about like you and me.

And he wed an average woman, Very nice and very human, Just about like Ebenezer, Neither very good nor bad; Oft in harmony they'd warble, Often they would scold and squabble, But they loved each other dearly, And they couldn't continue mad.

Never had enough on Monday To supply the house till Sunday, Never made enough in April To support themselves in May; If they worked hard in November, They must work hard in December, And the coarse bread of tomorrow Was the hard work of today.

They worked on, grew gray and grayer, Yet they never made him mayor, And she plucked no social honors, And his wages still were small; Then the load of years grew weighty, And they died when they were eighty, And they put them in the graveyard And they left them there. That's all.

RAILROAD PASSENGERS' RIGHTS.

Interesting Case of Long Standing Settled by the Supreme Court.

WASHINGTON, Feb. 2.-David T. Winter, a resident of Peabody, Mass., purchased a ticket from Boston to Chicago several years ago of the ticket agent of the Fitchburg road at Boston, paying \$3 above the BOSTON-Old Colony News Stand after limited rate for a ticket, which the agent told him would permit him to stop off at Olean, N. Y., on the Erie road, if he spoke QUINCY-Ledger Office, 115 Hancock to the conductor who punched his ticket, and told him it would be all right. When he boarded the train at Olean to continue his journey to Salamanca and beyond, the conductor of this train refused to accept his ticket because it was punched, and with considerable violence put Winters off McGovern Bros.' Periodical Store, Han- the train for refusing to pay his fare as far as Salamanca.

The next day Winters went back to WEST QUINCY-Post Office, Crescent Binghamton, and on his old ticket was permitted to ride to Salamanca without question. He sued the company, and on the trial the conductor admitted he had mistaken the ticket for a limited one, but BREWER'S CORNER-Miss Bartlett's, said it made no difference, as the rule of the road required a stop-over check to be obtained. The railroad company asked that a number of instructions be given the jury in its favor, among others that if the rules of the road required a stop-over check, Winters could not recover, and also that he could not plead the verbal statement of the Boston ticket agent. The court declined to give the instruction. Winters was given judgment for \$10,000, and the supreme court yesterday affirmed that judgment be given in favor of his administrator, Winters having since died.

IN FAVOR OF BOYD.

Supreme Court Declares Him a Citizen

and Lawful Governor of Nebraska. WASHINGTON, Feb. 2. - The supreme court of the United States has decided the Boyd-Thayer Nebrasba gubernatorial case in favor of Boyd. All the justices, except Justice Field, concurred in the conclusion of the court that Boyd was a citizen of the United States and entitled to the office of governor of Nebraska. Justices Harlan, Gray and Brown concurred in that part of the opinion which held that Boyd was a citizen, because from record in the case it must be considered as established that Boyd's father having exercised all rights of a citizen, had, in fact, in 1854 taken out his final naturalization papers, notwithstanding he did not have the record of such final naturalization

The court also held that there was such a thing as collective naturalization; that enabling act of Nebraska constituted a naturalization of all the inhabitants of the coffin lid be taken off for the purpose Nebraska at the time of its admission except such as desired to retain their foreign rights, and that Boyd's exercise of various offices showed his intention to become a citizen. The court reversed the judgment of the supreme court of Nebraska, and ordered it to take further proceedings in conformity with the decision that Boyd

PLEA OF INSANITY

Entered by Counsel for Miss Mitchell, Who Murdered Freda Ward.

MEMPHIS, Feb. 2.-Miss Mitchell and Miss Johnson were arraigned in the criminal court for the murder of Miss Ward. Miss Johnson's attorney entered a plea of not guilty. Miss Mitchell's attorney entered a plea of "present insanity" for his client. Miss Johnson was on the arm of her father, and Miss Mitchell walked between her brother and mother. The two young ladies were deeply veiled. When the clerk read the words "did cut, stab," would and murder Freda Ward," Miss Johnson began to sway to and fro and would have fallen but for her father's support. Miss Mitchell slowly raised her veil, cast a glance at her companion, and looked listlessly around the room as i she were only a spectator. When the clerk had concluded the reading of the indictment, Miss Johnson exclaimed, "I am not guilty." Miss Mitchell also exclaimed: "Not guilty." Her attorney said that for his client he desired to enter a plea of present insanity.

QUAY'S LIBEL SUIT.

Creates Considerable Surprise.

Beaver, Pa., Feb.—The defendants in Quay libel suit were sentenced to six months' imprisonment in jail, a fine of \$600, and the costs of prosecution.

Judge Wickham, in passing sentence, scored the defendants for printing alleged libellous articles even after Quay's denial of the charges against him and after the arrest of defendants. He also referred to the fact that the defendants had made no retraction. The sentence occasioned some surprise. It was supposed Senator Quay and not a legal requirement. would be satisfied with a nominal fine and perhaps one day in jail. After sentence had been passed, Messrs. Mellen and Porter were taken to jail to serve their term. It is said that after a short incarceration, application will be made to the board of pardons for their release. It is also rumored that their fines will be paid by the Democratic state committee.

Hoar charged his colleague with having written in words in the official stenographic notes of a speech which he did not deliver, interjecting Republican applause when there was no applause. In reply Mr. Morse said that Mr. Hoar was a kindergarten politician, that he was very young, and that when he was older he would know more. He admitted that he had made some changes, as the had shed tears because Mr. Crisp had been notice of them. Here the matter ended.

Suspicion That a Young Lady Was Buried Alive.

NO CERTIFICATE OF DEATH

Was Granted and No Physician Was Was Alive When Consigned to the Grave-Remains to Be Disinterred.

BUFFALO, Feb. 2.-The town of Dunkirk is agog over the story that pretty 16-yearold Francis Burke, heiress to a fortune, was buried alive there on Saturday. The young woman lived with her parents. Her death was quite sudden, and the burial took place without a coroner's or physician's certificrte of death being granted. Considerable speculation is being indulged in as' to who is responsible for the horrible affair, and immediate action will be taken by the proper authorities to fix

The young lady had been ill for some time! with pulmonary troubles, and on Friday morning, while sitting on her father's knee, she was taken with a coughing fit and

Fell Over, Apparently Lifeless. The parents, instead of calling a physi-

The mother of the girl protested, saying that her daughter was not dead; but owing to the fact that the priest who was to conduct the fu-neral services wished to leave the city Saturday afternoon, hasty preparations were made, and the interment took place that morning.

Before the remains left the house, members of the family say that a looking-glass was placed over the young lady's mouth for a moment, and when taken away there was moisture upon it; that her lips were red, and that

The Dunkirk people are indignant, and have demanded that an investigation be made. They say that if the parents believed their daughter to be dead, it was their duty to call a coroner at once, as the death was so sudden. Again, that Under-taker Kolb ought to know better than make an interment without a certificate of death from either a physician or coroner. Coroner Blood knew nothing of the affair until Saturday, but he will take the matter in hand and

Bring About an Investigation.
Mr. Kolb says that he had a burial certitificate from Dr. J. W. Pond, but the latter says that such is not the case. He further states that he has not issued a burial certificate for over a year. The townspeople have created such a fuss over the affair that the girl's remains will be disinterred, for the purpose of investigation.

Complications of the Grip.

The most serious complication of the grip is acute bronchitis. This may appear early or late. The breathing becomes rapid and difficult. A spasmodic cough is almost constant. The expectorations are glairy and tenacious. With all this there is a peculiar prostra-

> A third complication of the grip is connected with the heart. If patients sit up they become faint. Some die of simple failure of the heart; others are saved from death only by careful attention on the part of the nurse. After the grip has passed off, a tendency to faintness and neuralgic pains may remain for weeks or months.

> Another complication shows itself in a diarrhea; still another affects the nervous system and is characterized by pains in the head or elsewhere, or by weakness in certain parts of the body, such as the hands or arms.

As to treatment, the doctor must decide in view of all the symptoms. But the patient should in every case take to his bed. To keep about is exceedingly dangerous, especially as exposing the patient to the above complications .- Lon-

An Anticorn Law Leader Dead. Mr. Peter Alfred Taylor had so long retired from public life that the anouncement of his death will recall an almost forgotten name. But in his active days he did splendid public service. He was an aggressive Radical when Radicalism was unpopular, and the weak and downtrodden had always in him an ardent and active friend.

As a member of the Anticorn Law league, a defender of Mazzini, a champion of the northern states during the American civil war, a determined opvaccination and grants to royalty, he did much to stir up public feeling on these subjects, and when, after a parliamentary career of twenty-two years, he retired, owing to ill health, the cause of reform lost an honest and outspoken

Did More Than Was Expected. For hundreds of miles in the vicinity of Lake Austin, western Australia, there crops of all kinds have suffered. A number of farmers combined to bear the expense of rain producing experiments and £600 was subscribed. Walter Murchison, a chemist, was engaged, and after a fortnight's preparation a series of explosions were followed in less than four hours by drenching showers.

The atmospheric concussions not only produced copious falls of rain, but had an utterly unexpected but equally desirable effect upon the rabbits. The thundering explosions killed tens of thousands of rabbits, which had for years preyed upon the crops.—Yankee Blade.

TENA DAYIS' DEATH.

The Crime Charged to Trefethen

BOTH HELD FOR GRAND JURY.

Trefethen's Counsel Reserves fils Evidence for the Trial and Smith's Alibi Doesn't Help Him-Mrs. Davis and Others Testify-An All-Day's Hearing.

MALDEN, Mass., Feb. 3.-After a hearing in the district court on the Tena Davis murthe afternoon, James A. Trefethen, charged with the murder of the girl, and William H. Smith, charged with being an accomplice, were bound over to the grand jury, the former without bail, and the latter in the sum of \$10,000.

It was evident that the counsel for the defendants had no hope of keeping Tre-fethen's case from going before the grand jury, but he made a hard fight for Smith. None of the witnesses for the defense touched on Trefethen's case, but were called to the stand in the attempt to

Prove an Alibi for Smith. The crowd which assembled in the stuffy and foul-smelling little court room in the morning clung to their places all daylong, except at the noon recess, and showed no signs of weariness.

The most important testimony in the morning was that of Officer Tutes of Everett, who testified that he saw Smith standing by a buggy near the Davis home on the night of Dec. 23, the night Tena disappeared. Although the counsel for the defense mixed his evidence up somewhat, it was fully corroborated by others. In the afternoon the most important testimony was given by Special Officer Benjamin E. Morris, who testified that between 2 and 2:15 o'clock, on the morning of Dec. 24, he saw a crossbar buggy driven by a man who Looked Like Trefethen

She testified at length of her daughter's relations with Trefethen, telling how Tena had told her of her trouble, and of Tre fethen as being the author of it. The financial dealings with Trefethen were ex plained at length.

The remainder of the evidence consisted f points which have heretofore been made public in these dispatches. The evidence being all in, Lawyer Coggan told Judge Pettingill that he thought that the evi dence would

by Unknown Parties. NEW YORK. Feb. 3 .- Ward Waterbury the 8-year-old son of Charles P. Water bury, a wealthy farmer of Pound Ridge, was kidnapped by unknown men Monday while on his way to school. On that day the boy started for school at 8 o'clock. As he did not return at the usual hour, his mother felt anxious about him. In the evening, the boy being still away, the father went in search of him. On his return he found his nephew, Charles Water-Young Wife by Pokening - Verdict a bury, waiting for him with a letter, which the nephew said had been given him by a

SALISBURY TALKS POLITICS

Improves an Opportunity to Praise Conservatives and Berate Liberals.

LONDON, Feb. 3.-Lord Salisbury spoke yesterday at Exeter, where he met with an home. ovation from 10,000 Conservatives. He criticised the Liberal program as being obscure, indefinite and full of empty promises. The Radicals, he said, wer specially ready to assure the voters that they could obtain measures at the expense of their neighbors and the eighth commandment. He was opposed to the creation of parish councils, on which the Liberals seemed to rely as a means to improve the condition of laborers. He was hopeful that Mr. Chamberlain's old age insurance measure would remedy the distress prevailing among the working classes. It must not, however, impose serious burdens on the rest of the community nor involve presents of public money. Another remedy for relieving distress was the creation of small rural holdings. The existence of small holdings would provide the strongest bulwarks against revolutionary changes. Ireland, however, he said, remained the burning question of the hour, on which would rest the issue not only of the next election, but perhaps of others, and he appealed to the untry to uphold the union

A Big Hole in Arizona. G. K. Gilbert and Marcus Baker, the former chief geologist of the United GENERAL GRANT'S MEMOIRS. States geological survey, with a force of men, have returned to Flagstaff from Canyon Diablo, where they were sent by the government to take observations and make a map of the region where so much meteoric iron has recently been found. They spent sixteen days investigating the mammoth hole in the ground supposed to have been made by a meteor.

The hole is 655 feet deep and 2½ miles in circumference. The theory is that from the appearance of the walls and the fact that they have found many pieces of meteoric iron around the hole, the meteor penetrated the earth to a depth of 700 or 800 feet before it exploded, and this accounts for the strange phenomenon. Three pieces of the meteor, weighing 300, 600 and 800 pounds respectively, were found on the mesa within two miles of the crater and THE DAILY LEDGER, are now in the Smithsonian institution. Besides these they found many pieces weighing from two ounces upward .-

Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s rictly logical, because natura'. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by dead y germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all di cases of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

FREE COINAGE OF SILVER. Senate Committee Will Tackle It but

Will Probably Report Against It. WASHINGTON, Feb. 3 .- The senate committee on finance has at last resolved to grapple with the subject of free coinage of silver. At the meeting of the committee yesterday there was a discussion of the matter, and it was decided that the issue had better be met at once, so that the committee could not be charged with smothering the bills relating to free coinage. Accordingly it was resolved that at the meeting next Tuesday, the Stewart free coinage bill should be taken up and reported to the senate. There is little doubt as to to the nature of the report, for the discussion yesterday showed that two Democratic senators would probably join with the Republican majority in recommending adverse action on the bill.

Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfectly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all diseases of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

The Norwegian Ship Florida Sailing the Ocean Without a Crew.

NEW YORK, Feb. 4.- News of the abandonment at sea of the big Norwegian ship Florida has been brought here by the steamer Runic, from Liverpool, which passed the Florida Jan. 29, driving before the wind, and with canvas spread. Her hull and upper works were somewhat damaged, but her yards, masts and all headgear were intact, and it did not seem that she was in a condition necessitating abandonment.

The Florida sailed from Pascagonia, Fla., Dec. 31, for Dordrecht, with a cargo of southern products. She was com-manded by Captain Ellefsen, and carried a crew numbering twenty-five. Captain Ellefsen had trouble with his sailors at Pascagoula, the men asserting the vessel was unseaworthy, and when a few days out at sea they mutinied and refused to work her out of southern waters. Captain Ellefsen then headed toward Cuba, and Jan. 7 reached Havana. At the Norwegian consul's suggestion, the refractory seamen were put in irons and imprisoned in the hold. A new crew was secured, and on Jan. 10 the Florida again sailed for Dordrecht. Two days later the steamer Ciudad Condal passed her under full sail, about forty miles off the Florida coast. Her hull was very deep in the water. That was the last heard of her

CONVERSATION A LOST ART.

Almost Everything but Talk. When any number of persons wish to combine for social purposes nowadays they form a club. The club, however, is by no means a social organization. The pretext is some sort of mind culture, an arena for the discussion of some sub-

ject. Shakespeare's plays, Browning, Dante, the stage, indicate the simpler range of topics. Or if nothing better offers, the members set up a man of straw and have shies at him, a sort of inellectual game of Aunt Sallie. The town is honeycombed with such clubs. They are superseding dancing

mature. The common pleasure in meeting one another in good clothes and off duty no longer exists. Nor have the social affiliations that used to be found in the church and in the mission school any remaining power of social cohesion. It is a curious development, and is naturally in a more vigorous state among people from other parts of the country who have come here to live, and must find excuses for social organization outside those that exist in older and allied communities of people. An inherent

Gossipers are Busily Engaged Figuring on the Next Leader.

WASHINGTON, Feb. 4.—The western Democrats in the senate and house are program in New York. There have been several secret conferences in which the situation and prospects were carefully canvassed. There is no doubt, said Senator Brice, that if the west could present a grow,

By earthly joy, pain, labor, rest-through excellent prospect of securing the prize. The names of Senators Palmer of Illinois, Gray of Indiana, Carlisle of Kentucky and Governor Boies of Iowa were mentioned, but it was conceded that they were not sufficiently national in their relation to the Democratic party to command the

support of the party in the east.

In the event that there should be an irreconcilable contest in New York between the Hill and the Cleveland forces, and that the convention would be forced to pass these gentlemen, the tendency would, they conceded, be more to some other eastern nominee than to any of the western names mentioned. If Governor Russell of Massachusetts had more experience in national politics he would command prominent attention. SPRINGER'S FREE WOOL BILL.

It Meets Opposition from Members of WASHINGTON, Feb. 4.—Springer's free wool bill is meeting with considerable opposition by some of the Democratic members of the ways and means committee. Three of the members, Judge Turner, Mc-Millan and Wilson, who are old members of the committee, take the ground that if wool is to be placed on the free list, they want the duties on woolen manufactures to be cut down at least as low as they were in the Mills bill. They hold that it would be absurd for the Democrats to agree on free wool and then to have duties on woolen manufactures the same as imposed by the McKinley bill, with the exception of taking off the compensatory duties put on to offset the duty on raw material. To leave them in that shape would, in his judgment, be a virtual in-dorsement by the Democrats of the Mc-Kinley rates. Some friends of Mills in the house are strongly of the opinion that no tariff legislation will be allowed by the

over her masts. Seven men hung to the rigging for life. They looked ashore. Only 150 yards away stood a group of islanders, as helpless to succor those in peril as the latter were to save them-

Now the position of the vessel was this: Where Sandy point drops beneath the sea it does not end, but it is prolonged under the water, making thus a perilous sandbar. Out upon this bar was the Warrior. The island tide from the east and from the west meet here. There is no more terrible place in a gale than that where two seas collide.

The storm grew. Such was the work of wind and sea that times were when the sandbar from the shore to the vessel was swept naked. But its nudity was

Two men laughed madly. "Aye, maybe! Look now!" said one, with savage sarcasm.

The coward looked. The sea had swelled up and hidden the bar far beneath its foaming waters.

"Yet one may try!" cried the coward. "Try you then!" shouted the other. Now it is hard to meet death half way. It is against man's nature to walk to destruction. Even though he knows it be coming he has the hope or the cowardice to shrink from it to the last. by the coward.

Men Toward Relieving Russians. NEW YORK, Feb. 5. — The monthly meeting of the chamber of commerce yesterday was devoted to the discussion of means to ameliorate the condition of the victims of the famine in Russia. President Smith urged that aid be given to the starving and given promptly. Abram L. Hewitt said that thousands of barrels of

grain were awaiting to be shipped to Russia, and that it was necessary to raise at least \$25,000 to charter vessels to take this food there. Ex-Governor Hoyt of Wyo-ming said the western people were ready to donate thousands of bushels of grain to the sufferers in Russia, and were only awaiting the action of the New York people to aid in getting it there. Whatever was done, should be done quickly. The following resolution was adopted:

Resolved, That the president of the chamber of commerce be, and he is, hereby authorized to appoint a committee of fifty, with power to add to its number, and a quorum of which shall be ten members, to appeal to the citizens of New York and to the people of the United States in general for contributions to a relief fund to be distributed in Russia through such chan-

MASSACHUSETT'S LEGISLATURE. The "Drunk Law" and the Day Liquor

Bill-A Hard Rap at the Lobby. BOSTON, Feb. 5.-Henry H. Faxon ap peared before the house judiciary committee in support of his petition for the repeal of chapter 427, acts of 1891, relating to the punishment of drunkenness. He submitted a bill which practically restores the law to what it was before the passage of the "drunk" law," and which was re-cently introduced by Mr. Champlin in the senate. He also furnished the committee

1.50 upon the new statute.
3.00 There is a feeling of confidence among the temperance workers that they will se cure the passage of the Day bill, so called, which, in effect, abolishes the saloon by requiring that no liquors shall be sold, except in connection with food. Last year, it will be remembered, the clause in th law forbidding the keeping of a public bar was repealed, and if the Day bill is passed it will be tantamount to rescinding the action of the last session. But while the temperance people are trying to pass this law, they do not expect to secure the gov-ernor's approval. The cold-water men also hope to reduce the number of licenses

Judge Flint made no opening argument, but called

Dr. Gordon

the president of the Water Company. The Doctor briefly reviewed the progress of the ompany; the charter was obtained in 1883 and work was immediately started. The supply had been afterwards increased and nore recently a reservoir built. Since contruction of the reservoir the water had been colored. There were piggeries in lose promixity which were unsightly and liable to contaminate. The State Board of Health had said the piggeries should be emoved. Charter gave privilege to take water but not land. Not customary in 1883 to include land, therefore it was not hen asked. A plan was presented showing the low swampy land which it was deired to drain, also the location of the piggeries it wished to remove. The company wanted also to clean out the reservoir and out in a filter near the pumping station, nake extension of mains, and to fund its floating debt of \$67,000. Of the increased eapital asked, \$40,000 to \$50,000 was he remainder for extension of mains from time to time. The petition was not an unisual one and ought to be granted. It was in the interest of health. The population of the city had increased from 10,000 o 18,000 since the introduction of water.

Cross-examined by City Solicitor McAnarney, Dr. Gordon said he did not know whather the books of the company were present. When questioned about the finances he prefered that the treasurer, who was present, should answer. He had. 80 shares in 1887 and 200 now.

Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfectly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s'rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all discases of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is

Chicago has the honor of being the headquarters of the Pinkertons, and it was in the vicinity of that city that the arding was done. A few years ago-and I presume it is so now-there was in the Pinkerton building in Chicago a relic of the Inquisition. It was called the "sweat box." Never having been in it I cannot speak from experience, but it is a matter of common knowledge in that city that men have been seized, without warrant of law, and subjected to the most cruel and order to extract confessions or information from them. This is said to have been a common occurrence during the the people of Chicago, Dr. labor and anarchist troubles of 1886. The police department of the city maintained a rival of the Pinkerton "sweat box" at that time. I am personally acquainted with two men in Chicago whose minds were almost destroyed by the Chicago "sweat box" treatment, and they will never recover. WASHINGTON, Feb. 6.-Mr. Springer, chairman of the ways and means commit tee, has received a letter from David A. Wells, the noted political economist, in answer to an inquiry from Mr. Springer, asking his ideas of the best means of reforming the tariff by legislation. In his letter Mr. Wells says:

I find myself more and more inclined to the gress and of the executive, the wisest and most practical plan would be what might be termed tentative, rather than radical. To frame a new tariff bill wisely, embodying reform ideas—even if the plan of the Walker tariff of 1846 is adopted as a structure model—will require report below on the plan of the walker tariff of 1846 is adopted as a structure model—will require report below on the plan of the was for carrying on will require much time, great labor, and almost superhuman wisdom. The best experts can rarely tell wherein our complicated industrial and commercial organization, the final incident of any tax, will fall. No bill can be framed that will not contain inrongru and experience will reveal.

Mr. Wells, after referring to the heated

partisan political discussion that will follow a tariff bill, says:

Again with a complete tariff bill, the friends of reform would have to meet an entire force of protectionists, active and compact, through the attraction of further opportunity for public plunder. On the other hand, under the ten ive plan of comparatively few issues, the tendency of those interests not immediately affected would be to sluggishness and indifference. The old maxim, "divide and conquer," seems to me, therefore, most pertinent under Sir Robert Peel's Example.

Mr. Wells calls attention to the position taken by Sir Robert Peel, in dealing with problem such as now confronts tariffed gislation. Sir Robert, he says, consideration ered it from a British standpoint only i which he took the tentative method, t which, says Mr. Wells, he owes all of his great success. He continues:

By adopting the tentative method and send-ng to the senate a few sample bills enacted by he house-bills removing duties on wool, sal lumber, tin plate and the like—the Democratic party will define and formulate the plan and scope on which the tariff debate in the coming presidential contest shall be conducted. Gen eral debate will, to a great extent, be dis pensed with, and discussion will be concentrated on the essentials. Every senator wh

To Renewedly Present the detailed measures in question, rather than a general bill; for, in the face of a decided ratification of them by the people, it would be difficult to see how they could be rejected. and if accepted, even in part, the future work of reforming the tariff, either by a general bill or in detail, would be comparatively easy, for every interest deprived of further opportunity to plunder the public would follow the example of quinine manufacturers, when this commodity was put upon the free list, and be-came ardent tariff reformers, suggesting the fable of the old fox, who, when he lost his tail in a trap, was most anxious, for general considerations, that all the foxes should have their

tails cut off.

Such are some of the reasons which induce
me to prefer and recommend the attacking of
our existing tariff system in detail, or by
what I have termed the tentative, rather than
by a general bill, which involves a contest all along the line and has respect to every particlar, both of tax and administration.

preciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all discases of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

The company ask for the privilege to take land that it may do this. Many streets are not now piped, causing considerable dissatisfaction among the abutters. The company desires money with which to make extensions. Should Quincy appear in opposition, when the people have been "kicking" for years to accomplish just these things, even if it is a game of bluff on the part of the company | benefit. to hurry up the city to purchase.

The only solution of this water question s the purchase of the present works, and the proper course of procedure is under the city charter and the charter of the Quincy Water Company. The Act of 1891 products, and is likely to buy more largely the city charter and the charter of the is not popular with the people, and if accepted might involve the city in needless litigation. We don't expect the city can The stringency at the south, owing to the ever purchase the works at its own figure, and the company may be disappointed in not getting as much as the stockholders expect. We would suggest for the consideration of the Council this evening, that it ask of the Water Supply Committee of the Legislature a continuance of one or of the Grand Army of the department of two months, and that in the meantime New Hampshire Austin & Winslow's Express Office, the City Council submit the question of purchase of the works and franchise to the voters. A special election could be held within a month if desired. If it received favorable consideration it would then remain for the City Council to authorize or England: Slightly cooler: fresh north Catherine, daughter of Elliott Sanford, two ratify a contract for the purchase.

Temperance in High Life.

The wife of a leading senator says Never since the days of Mrs. Hayes has so little wine been taken at public official receptions in Washington as during the present administration. It is also true that very few official homes during this administration furnish wine, and even when it is furnished, the examples of the Harrisons, Wanamakers, Windoms, Milers, Proctors, Hustons, Hepburns, Dorchesters, Fosters, Morgans, and many others, has a restraining influence. Scarcely any of the men selected by President Harrison as his advisers ever take wine. Blaine is now a total abstainer. President Harrison does not take wine at any of the receptions-even when only gentlemen are present, and Mrs. Harrison never, under any circumstances, anywhere, takes wine."

That Leap Year Ride.

The young men who went on that leap year pung ride from Atlantic Thursday night think they were slighted, as their names did not appear. They also desire it known that they are popular with the girls. They were: George Melzard, Warren Nelson, Herbert Dudley, Bert Moxon, Charlie Rinn, Walter Winlock, Alfred Nelson, Fred Robinson.

Weather Bulletin.

A prediction for February made Jan. 31 said for yesterday and today, colder with a cold wave. Temperature may fall to zero or below.

For the second week in February, generally cold, fair weather until Wednesday, followed by a heavy storm of snow or rain. For the third week, generally fair, with nearly stationary temperature until Tuesday. For the balance of the week, uncertain.

The fourth week will bring an unusually heavy fall of snow, probably about the 26th or 27th, followed by decidedly colder weather.

The month is likely to end cold and blustering.

Ought to be smaller pill. There's too much unpleasantness for the money. Ought to be better, too. They're big enough, and make trouble enough, to do more good.

That's just what Dr. Pierce's Pleasant Pellets do, - more good. Instead of weakening the system, they renovate it; instead of upsetting, they cleanse and regulate it—mildly, gently, and naturally. They're the original Little Liver Pills -the smallest but most effective, purely vegetable, perfectly harmless, and easiest to take. Only one little Pellet for a gentle laxativethree for a cathartic. Sick Headache, Bilious Headache, Constipation, Indigestion, Bilious Attacks, We met, clasped hands and said the common and all derangements of the Liver, Stomach and Bowels are promptly relieved and permanently cured.

They're the cheapest pills you can buy, for they're guaranteed to give satisfaction, or your money is returned. You pay only for the good you get. It's a plan peculiar to Dr. Pierce's medicines.

CISSIE AND CARRY.

Seymour Gladbrook was a young man of great promise. He had just commenced his third year at Oxford, and every one expected him to take a high place among the cleverest men of his year when he went in for his tripos. Washington, Feb. 6.-Collector Ed- But young Gladbrook was no bookmunds of Bridgeport, Conn., in a letter to the secretary of the treasury, says that the report of assault by the Bridgeport populace upon the British schooner Glendon, on Sunday last, for entering that the age of twenty-one he found himself port without flying the American flag, was his own master, with an income suffiall a hoax. After referring to the incident, as published in the papers, he says:

This would have led many young men amediately sent an officer to the into excesses, but Gladbrook was steady wharf where she landed, with orders to report if there was any trouble. I also asked himself upon being adamant to the fair ened to go on his vessel and take down the sex—a fatal mistake in most cases, and flag. His answer was a most emphatic suggestive of the Scriptural warning, denial; also that he knew nothing about "Let him who thinketh he standeth beany disturbance until he read it in the pa- ware lest he fall." On the night of the pers. There were a few young men who university boat race, in the year 18—, guyed him about his flag, but he took no Gladbrook was sitting in a certain stall notice of it. The officer came back and at the Vampire Music hall. establishment of two manufacturing carried direct to them, together with the name of the originator. Henceforth Cissie and Carry were known far and wide only as Scylla and

Charybdis, and they pretended to appreciate the jest, but in their innermost souls they (especially the elder) cherished a longing for revenge against their insidious defamer. Cissie (Scylla) expressed a strong de-

After this Gladbrook seemed to find these sisters everywhere he went. If he was on a race course they were sure to be the guests of a friend of his. If he went out to supper they were always invited, until he quite unconsciously drifted into the friendliest relations with

It was quite evident to every one but Gladbrook that he was under very heavy fire from the batteries of Scylla, a fire which no man had withstood for long. She was then in the first flush of youth, faultlessly beautiful in form and feature, charming in manner and such a master of the arts of fascination that they appeared to be part of her nature. Gladbrook's friends first chaffed and then warned him. He laughed at them and called himself a misogynist. At first it seemed as if he would prove invulnerable to the fusillade to which the lady continually subjected him. He trusted to his armor of indifference and was too proud to retreat from danger. His pride led to his fall. He fell as only brave

men do, utterly and hopelessly defeated. The capitulation of young Seymour Gladbrook, which caused so much diversion and amusement to his friends, was sad to behold. The fact of his having been indifferent to other women all his life made him give himself heart and soul to this one. Cissie Pool was jubilant. The paraded her tame lover on every possible occasion, in order that all men and women might see how complete her victory had been. He lavished the employes at Deer Island, including the presents and jewels upon her until she sparkled from brow to waist with diemonds, and people wondered how much longer young Gladbrook's money world hold out. But in proportion as the spirits of the elder Miss Pool rose th.ose of her sister seemed to give out. She became depressed and dull. The few admirers she had dropped off one by one, seeing that it was as hopeless for them to try and win her affections as it was for her to expect one tender glance from the man she worshiped. Seymour Gladbrook is not the only man who has deserted the substance to purisue the shadow, and, blinded by the 'beauty of the form, has ignored the purity of the soul. Carry's nature was as perfect as her sister's figure, while in Scylla's character there was scarcely a redeemor self respect.

penny of his modest patrimony had been squandered upon his enslaver, and he had no security on which to raise

It was the night before the sisters were to sail, and he was sitting in his chambers, thinking dejectedly over the situation, when his servant brought him a somewhat bulky parcel, which had been left at the door by a young lady in a cab. The parcel was placed on the table and left for some time unnoticed by him until he caught sight of the writing on the brown paper cover as he paced up and down the room. In that casual glance he recognized the pattes de mouche of his enchantress. He tore the parcel open in a fever of excitement and found a good sized wooden box, on the top of which lay a letter addressed to him in the same hand. He tore open The lady's letter was brief and eminently practical:

DEAR MR. GLADBROOK-A year ago you made an idle boast and a cruel jest. You be-lieved yourself invulnerable and sneered at two young women about whom you knew

You have run upon the rock and sunk in the whirlpool, but the sea gives up its dead.

unwillingly, P. S .- You may thank my sister for getting your money back.

Half dazed and hardly knowing what he was doing, he hastily opened the box and took out one by one the trinkets he had given her in their dainty morocco cases-hearts, darts, anchors for hope, serpents for eternity; at the bottom he found another letter, just like the former, only more bulky. With a sinking heart he tore it open. It contained a long bill, stretching over several sheets of note paper, setting forth every item of his expenditure at Richmond, at Greenwich, at Blanchard's, at Kettner's, at Epsom, Ascot, Sandown and Kempton Park; for ices and exhibitions; for carriages, rail and cab; all that he had spent from start to finish in entertaining the Sisters Pool. And with this lengthy list of expenses were bank notes for £66 13s. 4d. per cent. of the total.

He was allowed to pay for his own entertainment, but was recouped for all his outlay upon the two ladies. The adjustment of accounts was on the strict-

The thing was too deliberately done on her part to admit the possibility of undoing. She meant to insult him-had leading him on with every fascination she could command. He must stomach the affront, but he could not pocket that money, hard up though he was.

In an advertisement in the second col umn of The Times the treasurer of a well known hospital for women and children acknowledged the gift of £379 13s. 7d. from the Sisters Pool.

The people who praised the munificence of the gift wondered at the oddness of the amount, which was the exact total of the sisters' restitution to their entertainer. A week later a relative, who was a

After two years' domestic un happiness he lost his entire fortune in a single day and committed suicide before night. Carry remained single. They returned to England to find other goddesses reigning in their stead and a new race of fanatics worshiping at new 8'arines. She always read the political news when she returned home after her day's work. Gladbrook never gave up his stall at the Vampire until the Sisters Pool retired from the boards, and then he never entered a music hall again.

Beauties and Advantages of the Situation.

FIRST.—They are on the sunny side of Pine Hill, so situated as to have the cold north and east winds completely cut off, making the air soft and balmy so desirable in this climate.

SECOND.—They are in a natural valley and park. The Red Granite, which is looming up as a most desirable building stone, is quarried on the north side, furnishing work for many men, and which will soon employ thousands. This granite is fast gaining popularity in the building and monumental markets.

THIRD.—This land is approached by drives from Braintree on the east, Willard street on the west, and from West street on the north; also from South Braintree.

A BEAUTIFUL SHEET OF WATER, COVERING 50 ACRES,

lies not far away to the south, belonging to the Quincy Water Company. The Old Colony sand pits, with their sidings, are not far distant. A natural spring of abundant water, pure and sparkling, is flowing through the grounds, making it easy to obtain water in building and for domestic uses, until a well is dug. Water free to all. Plenty of sand and building stone very near the grounds. No grading to be done; no rocks to be taken out; only to build your cellar and erect your house thereon.

Another reason why you should buy at once:

It is only 15 minutes' walk from South Quincy, and soon it is expected that the railroad will have a station at the foot of Liberty street, on the branch his nakedness. NEW YORK, Feb. 8.—An appalling catastrophe, paralleling in horror and perhaps exceeding in loss of life the Park place disaster of last summer, occurred in this city early yesterday moring. The Hotel Royal, at Sixth avenue and Fortieth street, opposite Bryant park, was completely destroyed by fire, and a large number of people were burned, suffocated and crushed in the ruins. Five burned, saw smoke coming through the crevices of mangled and disfigured bodies, within a their bedroom door. Mr. Meares had only mangled and disfigured bodies, within a short time after the breaking out of the retired at 1 o'clock, and was aroused with flames, were removed to the morgue, and difficulty. He sprang out of the bed and it is feared that scores of other victims ran into the hallway. Volumes of smoke it is feared that scores of other victims

are buried in the ruins.

The fire broke out shortly after 3 o'clock and spread with fearful rapidity, the flames soon enveloping the entire building and cutting off all means of escape for the guests rooming in the upper stories of the to his wife, "Now follow me," snatched building. The origin of the fire is unknown. It started in the basement, near the elevator shaft, which was located in the middle of the building.

The flames were first seen pouring out of the cupola on the roof, directly over the elevator shaft, by an engineer on a Sixth to the banisters. Flames were shooting up avenue elevated railroad train, who

Stopped His Engine directly in front of the hotel and blew the locomotive's whistle loudly and continuously. This unusual sound awoke many sleeping people in the hotel and brought policemen to the scene, who at once sent out a fire alarm from a near-by signal box. eanwhile the employes of the hotel on night duty sought to arouse the guests by their cries of "Fire." So rapidly, however, did the flames increase, that it range the farmes increase, that it range the fearly cries of the imprisoned seemed an age before the firemen arrived, although the first appratus rattled up to the scene within a few minutes after the promptly rang three more alarms in quick

Meanwhile, heart-rending and sickening scenes, that appalled even the experienced firemen and police were being enacted. The horrified crowd that had quickly gathered in the stre ets about the doomed building saw men and women, clad only in their night clothes, jump from the upper stories and fall upon the stone flagging of the sidewalks

or seriously injured. Every window of the building seemed filled with men, figures could be seen come sliding down women and children, crying out piteously to those below to save them. Some of these were certainly burned to death, as the police say they saw them suddenly disappear from view, while gerat masses of flames burst out of the windows where the wretched victims had just been stand-

The first hook and ladder company arrived about seven minutes after the flames were discovered, and firemen at once run up ladders to the hotel windows. Firemen, policemen and citizens mounted the ladders and carried down women and children to places of safety. They worked very rapidly, for by this time the staircases store. and elevator shafts in the building were enveloped in flames. The fire escapes in the rear of the building afforded a means of escape to some, whilst the fire ropes provided in all rooms were utilized by many male guests in reaching the street. Frederick Uhlmann, a dealer in hops, who has been a guest at Hotel Royal for years, had a room on the second floor. He escaped down stairs to the street with difficulty, with only an overcoat to cover

thing in his room, Including \$12,000 in Cash, able business documents. He was very cheerful, however, because his mother and brother, who lived with him at the hotel,

had left town Saturday. The flames threatened to envelope adjoining buildings, and the firemen did their utmost to prevent this. When the walls of the hotel fell, people at several windows on the top floor, crying for help, fell back and were buried in the ruins. The flames illuminated the sky for miles around, and drew to the scene an immense throng of people. Crowds also visited the

Many are Yet Missing.

When the flames were gotten under control search was made for the register. A newspaper man was found making off with it, thinking thereby to secure a "beat" by printing exclusively the list of names. He may have to answer to a charge of larceny. The register was of compararooms registered nor did all who registered put down true names. It is feared that a search in the ruins

will reveal many ghastly finds. It was reported at a late hour that no less than 100 people were still uncounted for. House Was Crowded.

The hotel had 124 rooms, and nearly all were occupied on Saturday night by guests. The hotel managers and employes made up the balance of the list of those in the building. Of Inhalation has only begun to be ap-

eciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfectly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is strictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Grippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all discases of Throat and Lungs, succumb to e marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

Its contents are not altogether satisfactory to the administration, and is regarded as capable of construction to suit circumstances. The announcement at this time, of his withdrawal, it is charged, is to enable the opponents of Harrison to concentrate their forces upon a new candidate. Now that the field is open there are several that will come to the front. It is expected that from this time forward there will be a desperate struggle by the friends of the different candidates in behalf of their preferences. Among the names already mentioned in connection with the presidency are Senator Cullom, Minister Lincoln and Judge Gresham, all from Illinois; ex-Speaker Reed, Senator Allison, John Sherman and General Alger. The friends of President Harrison, however, are said to feel no concern whatever, as they look upon his renomination, now that Blaine is out, as inevitable.

Light on the Subject. Fragmentary and incorrect reports of a conversation had some time ago between Secretary Blaine and Colonel Vincent A. Taylor, member of congress from the Cleveland district, which throws much light upon the reasons for the secretary's letter of withdrawal having been cirlated, Colonel Taylor last night gave to a United Press reporter the following ac-THIRD.—This land is approached by drives from Braintree on the east, Willard direct question whether such a conversation actually took place, Colonel Taylor

I refer to one, that Mr. Blaine was holding on, so as to prevent others from coming into the field; and to another, that there was an unfriendly feeling between himself and the president. I had said to him at the beginning of the talk: 'I have a few things that I want to say to you, and then I wish to add a few words on my own account.' I added that I had not come to ask any question, and that if he did not say anything, I certainly would not be able to tell it.

"Then in a few minutes he gave a summary of the present situation, referring to himself only as one of the elements thereto, and through all ran the thread of an argument that he should not be a candidate, and he wound up the interview by into a gully at Scranton, Pa. saying; 'and in addition to all keep in mind this, that if it be clearly shown me, or as clearly as anything present can be, that I ought to be a candidate, I have in myself certain elements regarding my candidacy which I must consider.' As I left him, he said: 'It's a great question; I am doing the best I can to study it out, and when I have it settled, I will make known my decision.

Possible Contest Concerning Savings Banks and Trust Companies.

Boston, Feb. 9.-In their annual report the savings bank commissioners, in speaking of the danger of the savings bank system, place especial emphasis upon the opening of a savings department by national banks and trust companies. The commissioners say with regard to trust

companies:

It has been a governing principle of the statutes ruling the management of our savings banks that business or commercial risks thould be entirely eliminated therefrom. The fact of a trust company maintaining a sav-ings bank department which by the nature of its charter takes all business risks, is really that of a savings bank engaged in busine ventures. It seems to this board that to allo a system of savings banks to become established, though under the guise of a trust company, is striking such a dangerous, if not disastrous, blow at the fundamental principle of the savings bank system that it merits immediate attention and correction.

There is likely to be an earnest effort on the part of the Lynn Trust company, in WASHINGTON, Feb. 9.—Blaine's brief letter to Clarkson is still the theme of much comment among politicians and officials the commissioners' report, and a very interest of the commissioners' report, and a very interest may come out of the which other trust companies may join, to teresting contest may come out of the

Thomas N. Doutney Arrives in Town-Speaks Complimentary of Mr. Faxon.

It was not a large attendance which reeted Thomas N. Doutney in Hancock hall last night. Certainly the speaker and the cause deserved a crowded house. However, if marked and close attention are an indication of earnest approval, then Mr. Doutney may feel well complimented. MANGLED BODIES REVEALED

In the Search Among the Ruins of the Ill-Fated Building-Arms and Legs Missing in Many Cases-Work Being Rapidly Pushed Forward.

NEW YORK, Feb. 9.—Careful examination of the hotel register and the journal which was furnished by the night clerk, the number of persons in Hotel Royal when the fire broke out was 162. Eightyone were rescued by the firemen, assisted

Workmen digging in the ruins of the burned Hotel Royal at Sixth avenue and Fortieth street, yesterday and last night, unearthed eight more bodies of victims of Sunday morning's disaster. This makes a total of thirteen bodies recovered, twelve of which were removed to the morgue. Of these, five have been identified with more

In the list of persons who are known or supposed to have been in the hotel at the these names are obviously fictitious, and in several cases there is but slight ground still remains unexplored in the basement.

Work Upon the Ruins was resumed in earnest yest day, the hard and disagreeable work being done by 100 Italian laborers. Early in the day and the men of truck 12 explored the structure standing in Fortieth street. On the fifth floor of this uilding, in a front room, the firemen found the body of a woman who had met her death kneeling. Her clothing, if she wore any at the time, was burned from her. There was a chased gold ring on the third finger of her left hand. Her coffin was marked No. 6.

The second body found yesterday was found under the restaurant. It was that of a man. His legs were burned and crushed, but the face, though blackened, would be recognizable. He was about 35 years old, and partially dressed. He wore a dark suit, cotton undershirt, and carried a gold double-case watch and link chain. A triangular emblem, with the motto "Life, love, truth," was in his waistcoat. He had a dark mustache. Detective Kemp numbered his coffin 7. A little later the Italians turned up, in

A Suggestion to Sell Adams and High

School Property and Build Anew. A gentleman well versed in school matters, in conversation with a LEDGER reporter Monday, when asked what he thought the best plan for the city to adopt in the way of better school accommoda-

tions, said: Let us sell the present High and Adams school buildings with the land, and use the money thus obtained with an appropriation from the Council, and erect a large building on Elm street somewhere near the corner of Union street. A school building there would take all the children living east of Phipps street, including those living around Dublin, so called, and Brackett street. Then all the children living west of Phipps street, many of whom now have to walk from Brewer's corner to the Adams building, could be accommodated at the new Brooks avenue school, which would also releive the John Hancock.

Of course there are a number of the girls now attending the High school who would not be eligible to attend the new Woodward school, but an arrangement could be made to send them to Thayer Academy at workers together with the Association, and Braintree, the city paying the car fares, and the boys now attending the High implies that such helpers and co-laborers school could be sent to the Adams Academust be women. By this perfectly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is strictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all diseases of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

a Question to President Harrison, SAN ANTONIO, Feb. 9 .- A sensation was created among the Mexican population and in military circles here by the publication of a letter a letter addressed to Hon. B. Harrison, President of the United States, from Catrina E. Garza, the revolutionary leader, in El Chinaco, the leading Spanish newspaper of this city. The letter is dated Jan. 31, 1892. In his preliminary remarks to the editor

Garza states that he has fowarded President Harrison the letter, but that he fears that the latter will not make it public, and as he desires to have his position and action toward the United States clearly understood, he decided to send a copy of the letter to El Chinaco for publication The letter is for the most part an attack on the Mexican government, and particularly President Diaz. At the end of the public reception the veral state officers entered the private office in a body and paid their respects to the new governor and were presented to his family. Governor Boyd was then

INVESTIGATIONS COMING.

Tariff, Census Bureau and Financial System of the Government the Issues.

WASHINGTON, Feb. 9. - A number of res olutions proposing investigations of one sort or another have accumulated in the house rules committee. The committee will hold a meeting this afternoon, and perhaps to some extent clear its docket. Should the greater part of these resolu-tions be adopted by the house, there would be enough investigations in pro gress to last for some time. The tariff is the object of attack in several of them. The pension bureau is assailed in two resolutions. One resolution is for an investigation of the census bureau. Mr. Hoar wishes the manufactures committee to in vestigate the effect of the tariff on manufactures. One of the most comprehensive of all the investigations proposed is embodied in a resolution offered by Mr. Livingstone, which seeks information as to the financial system of the government and its various kinds of money and circulating medium. Mr. Simpson asks that the agricultural department be investigated.

Origin of the Piano.

The pianoforte was invented by Bartolommeo Cristofori, a harpsichord maker of Padua, Italy, who exhibited four instruments in 1709. The honor was formerly claimed by Marius, a French maker, who produced a piano in 1716, while German writers maintained that Schroeter, of Dresden, was the inleged fact that their opponents are short | itiator of the instrument. The earliest date ascribed to the latter's achievement, however, is 1711. During the present century, however, an Italian document was discovered, written by Marchese Scipione Maffei, a Florentine scholar, in 1711, which testifies that Bartolommeo Cristofori, of that city, exhibited four pianos in 1709, which statement was originally published in The Giornale in They would gladly pay a big price for that year, accompanied by a diagram of proof that the antis were pensioners of the Liberal party. It would give them a splendid opportunity to denounce their difference between the harnsichord and difference between the harpsichord and the piano.

Father Wood, an English monk, living at Rome, is also said to have made a pianoforte similar to Cristofori's in 1711, which he exhibited in England, where it attracted much notice.

Cristofori did not remain idle after introducing his first instrument. He became prominently known as a maker, but died in 1731, comparatively poor .-Daniel Spillane in Popular Science Monthly.

which numbers among its members nearly all the foremost Democrats of Colorado, gave a grand banquet here last night in nonor of Samuel J. Tilden's birthday. There was a large attendance, including Governor Boies of Iowa, Ex-Governor Crit-tenden of Missouri, ex-Governors Adams and Grant of Colorado and ex-Governor Baker of Wyoming. President McKinly delivered an address of welcome. Governor Boies was the chief speaker of the evening. His theme was "The Democrat

in 1892 Governor Boies' remarks were mainly levoted to the tariff question. The governor maintained that tariff reform was the supreme issue, and this alone would lead the party to victory. A number of other speeches were made. A letter was read from United States Senator George G. Vest, declaring his unwavering desire for the re-election of Mr. Cleveland. Ex-President Cleveland sent a letter, and many other letters were received from all parts of the country. Mr. Cleveland's let-ter was in praise of Tiiden and did not

Applications from the above cities for representation in the circuit of eight clubs, which is to be formed, were referred to a committee which will visit the cities and report to a meeting of the League to be called later. President White was appointed to represent the Eastern league at the meeting of the national agreement committee in New York city early in March. The plan of organization provides limit for each club of \$2000 a month. Provision was also made for a double championship season. The general admission will be 25 cents. Ten per cent. of the gate receipts are to go to the League, 50 per cent to the home club and 40 per cent. to the visiting club. The season dues for each elub were fixed at \$250.

ROPE FIRE ESCAPES.

Massachusetts Hotel Keepers Receive a Warning from the Chief of Police. Boston, Feb. 10.—Chief Wade has taken advantage of the terrible lesson contained in the loss of life at the Hotel Royal fire in New York to send out a word of caution to Massachusetts hotel keepers in regard to rope fire escapes.

The law in relation to this subject was passed immediately after the holocaust at the Leland Hotel in Syracuse, N. Y., and in the circular which he sent out yesterday he quotes section 1 of that law, that all hotels should provide their rooms with rope escapes. Reports have come in of late that some places had grown lax in this respect, and the chief thought the present a good time in which to reiterate the caution and to suggest that the punishment for failure to comply with the same was a fine of not more than \$500, or imprisonment of more than six months, or

A Man Arrested Charged with Poisoning a Woman in October Last. NEEDHAM, Mass., Feb. 10.—State Detective George C. Pratt, assisted by Officer Wragg of Needham, arrested Eugene W. Clayton at East Braintree yesterday on charge of murder by administering paris green to Mrs. Sarah A. Bradbury of Dover, Mass., on the night of Oct. 30 last. Clayton has worked on the farm of Mrs. Bradbury for the last three years. Mrs. Bradbury was taken violently sick on a Thursday morning and died Friday at about 6 o'clock p. m. Suspicions of foul play have been entertained for sometime.

An inquest was held before Judge Grover last week, and a warrant was issued for the arrest of Clayton on evidence submitted by Medical Examiner Bemis and other doctors; also on the testimony of Officer Wragg. Clayton's case was continued until Feb. 19.

A SELF MADE MAN

BY M. C. McCLELLAND.

An Illustrated, Copyrighted Serial.

Here is a theme attractive and interesting to all classes of readers. The self made man is a distinctively American product, and although he is common enough, his picturesque personality never fails to arouse the curiosity and admiration of the populace.

In this tale we have an excellent type of the self made man.

NED ANTHONY,

A Forceful, Self Reliant, Self Educated Virginian of Humble Origin, Acquires Great Wealth in Western Mines.

He returns to the Old Dominion, and by the influence of his wealth and native force of character gains recognition in the

Select Circles of That Old School Aristocracy

Which still flourishes in the valley of Virginia. The tale is well told and the characters are truthful and life like-nothing strained or unreal about them. Of course there is a love story running through it allwholesome romance which interests the reader without tormenting him-and some fresh, breezy, western scenes which contrast sharply with the quiet tenor of life in Old Virginia.

to cut off the High school scholars they could do so. Mr. Corthell-This question of trans-

portation should be settled once for all. If we transport the Atlantic scholars to the High school it is no more than right that we should transport the Wollaston and West Quincy scholars, and an amount should be included for that purpose.

Fr. Roche said that while he agreed with Mr. Corthell, he thought the Council would pass the Atlantic scholars but would draw the line through the others. Mr. Porter did not see why the city

should be called upon to pay for transportation, but believed that Wollaston and rock upon which the sentiment and opin West Quincy should be included if the Atlantic scholars were carried.

Fr. Roche believed the Atlantic scholars extra tax upon the people to pay the car fares of their children. If property in Atlantic was not assessed as near to its value as that in the Centre, things would be different. Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfectly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe, Catarrh. Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all discases of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

Bump Into One Another in a Chicago

Street with Serious Results.

CHICAGO, Feb. 11 .- A cross-town street

car, running from Lake avenue to Halstead

ger train on the Pittsburg, Fort Wayne

and Chicago road. Two persons were

badly hurt. Fifteen more escaped death

by the narrowest of chances. The train was north bound and was running at a

high rate of speed. The flagman signalled

the driver of the car to "come on," and

just as the driver reached the tracks the

train crashed into the car, knocking it

from the tracks. There was a shricking

of passengers, and for a few moments it

looked as if all must have been killed.

When the train had passed it was found that no one was killed. The Thirty-fifth

street police were called and a patrol wagon removed the injured to the hos-

pital. Street Car Conductor, Coughlin was arrested, as was also the lagman at

the crossing. The railway men declare that the tracks were clouded in fog and

smoke at the time, so that the approaching train could not be seen.

A SELF MADE MAN

BY M. C. McCLELLAND.

An Illustrated, Copyrighted Serial.

Here is a theme attractive and interesting to all classes of readers. The self made man is a distinctively American product, and although he is common enough, his picturesque personality never fails to arouse the curiosity and admiration of the

In this tale we have an excellent type of the

self made man.

NED ANTHONY,

A Forceful, Self Reliant, Self Educated Virginian of Humble Origin, Acquires Great Wealth in Western Mines.

He returns to the Old Dominion, and by the influence of his wealth and native force of character gains recognition in the

Which still flourishes in the valley of Virginia. The tale is well told and the characters are truthful and life like-nothing strained or unreal about them. Of course there is a love story running through it allwholesome romance which interests the reader without tormenting him-and some fresh, breezy, western scenes which contrast sharply with the quiet tenor of life in Old Virginia.

for Bothering Dr. Newton. NEW YORK, Feb. 11.-Richard A. C. Gaebler of Butte City, Mont, was arrested at the instance of Francis Newton, son of Rev. Dr. Heber Newton, on the charge of annoying the family with frequent calls and persistent demands to see the doctor. He is thought to be the crank who recently sent a threatening postal card to the doctor, which, after threatening to take his life, concluded with the signature, Peter Buell, Crank No. 7. Gaebel denies the authorship of the pos-

Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfectly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is a rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deady germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all di cases of Threat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

Liquor Legislation Which Will Excite Comment-Committee Reports.

Boston, Feb. 12.-The committee on the liquor law reported against requiring a three-fifths vote on the license question, also on the proposition that a vote upon the question of granting licenses shall stand for three years. In the bill which the committee have seen fit to report they have incorporated one provision at least which is looked upon as an interference with private rights. The second section of the bill provides that \$.50 "every common carrier shall keep a book 1.50 in which he shall enter at the time of 3.00 every delivery by him of any intoxicating liquor, the date thereof, the name and address of the consignor, the name and address of the consignee, the place where delivered, and the kind and quantity of liquor; which book shall at all times be open to the inspection of mayor and aldermen, board of license commissioners, se-lectmen, sheriff, deputy sheriff, constable, police officers and justices of the peace."

The first section of the bill goes far ough, it would seem, in requiring that ntoxicants brought into no-license towns 'shall be contained in vessels or packages plainly and legibly marked with the name and address of the seller or consignor and purchaser or consignee, and with the kind and amount of liquor therein contained," and it strikes the impartial mind as an day. impertinence that the name of every citien who receives a package of liquor shall e publicly advertised, as it would be under the bill as drawn.

In the senate the bill was laid over until Tuesday next, Mr. Coveney of Suffolk having raised the point of order that the bill was broader in scope than the petition pon which it was based.

Horse Sense

The other day, while Mr. G. L. Emrey, of this place, was away from home his horse got loose in the stable and, gainng access to the feed chest, overloaded his stomach with good things and pretty soon was crazy with the pains which colic brings on. He broke out of the stable and ran as fast as his feet would carry him through the streets to the Patterson House, where he had been doctored some time before. The horse by his actions soon showed himself to be a pretty sick horse, and was taken in charge by Dr. Bechart, who brought him around all right. Three weeks ago Francis Torrey of Nash's Corner engaged a woman in Boston to do housework. She came out and remained a week, at the end of which time she complained of suffering from the tooth- C. S. HUBBARD, ache and said she was going to consult a physician. She left the house for that purpose and has not been seen since. The woman left her trunk and effects at Torrey's and her absence is a mystery. Officer Bailey is looking up the matter.

The cases which has been pending against the town of Weymouth for the past seven years, for land and water damages, claimed by the mill owners on account of the town taking water from Great Pond, have been compromised, the Water Commissioners having made the claimants an offer which has been accepted. This settlement saves the town something like \$5,500, exclusive of the legal expenses.

The local political pot in Weymouth is eginning to boil and it is said a movement is on foot to defeat the renomination of Selectman J. Clarence Howe of Ward Five. Mr. Howe is a Democrat and the present chairman of the board. It is umored that the entire ward committee of both parties are opposed to Mr. Howe and are working to nominate Quincy L. Reed. Mr. Howe has been on the board for five years and has been the choice of the citizens' caucus during that time.

Yesterday's Storm.

The storm of Thursday was the heaviest of the season and did much damage among the telephone and electric light wires through the city. Some of the telephone wires became crossed with the trolly wire of the Street Railway which resulted in a number of the instrnments being burned out. The fire alarm wire also became grounded and shortly after 1 o'clock, the tapper in Chief Ripley's house struck four, the other strokes could not be counted and Mr. Ripley thinking there was a fire, made a lightning hitch and in a few seconds he made the snow fly between his house and the central station. Gill started out on the line and after-much labor cleared it. It was a hardday for the electrics and Supt. Weeks was out early in the day with a large force of men clearing the tracks. He kept the cars running but advertised time was impossible. The men worked late into the night, and this morning cars were making the advertised time.

Many of our local astronomers are admiring the spot in the sun. All that is needed is a piece of smoked glass and the spot can be plainly seen.

Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all dieases of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

LONDON, Feb. 12.—At the funeral services over Mr. Spurgeon's remains yesterday, the members of Mr. Spurgeon's family at present in London, the mayor of Croydon, several members of the house of commons and deputations from sixty religious bodies were among those present. After the singing of the last hymn that Mr. Spurgeon had announced before he was taken sick, "The Sands of Time are Sinking." Rev. Mr. Pierson made a most eloquent address. He dwelt at length upon Mr. Spurgeon's powerful influence. Mr. Pierson concluded his remarks by drawing parallels between the work done by Mr. Spurgeon and that performed by John Wesley. How the Senate Stands. Senator Teller, in view of the talk last year (which has been to some extent renewed this year) about a compromise of the silver question on the basis of free coinage of the American silver product, saw a number of the leading senators yesterday with a view to ascertaining the feeling on the senate side. He found that many leading Republicans were opposed to it, and that it had very little support from men opposed to unlimited free coinage. Speaking on the subject Senator

did so, I talked with a number of anti-free silver senators for the purpose of ascertaining their views. They were very frank in their opposition to the American free coinage proposition, and Mr. Sherman, Mr. Morrill and Mr. Allison said they would infinitely prefer unlimited coinage of silver to free coinage of the American

WASHINGTON, Feb. 13.-A census bulletin on flax production shows the total area devoted to the cultivation of flax in the United States in 1889 was 1,318,698 acres, the production of flaxseed 10,250,410 bushels, the production of fibre 241,389 pounds, the amount of flax sold raw or so utilized as to have a determinable value, 207,757 tons, and the total value of all flax products, \$10,436,228. Although flaxseed is reported from thirty-one states, Minnesota, South Dakota, Iowa and Nebraska produced 80.06 per cent. of the total amount, or 1,035,618 bushels in excess of the entire production of the United States at the cen-

Flax is now cultivated almost exclusively for seed, and in the old fibre-producing states its cultivation is almost entirely abandoned. There are indications, how-ever, of a revival in the United States of a linen industry that will afford a market for fine flax fibre of domestic production, and revive a branch of agriculture that has for many years been almost extinct.

SUNNY SIDE PARK LANDS.

RED STONE VALLEY, On Braintree and Quincy Line.

These lands have been made into house lots, thus opening up a large tract of land, most desirable to the workingman, and at prices so low that every ma should have a lot and make a home for himself and family. Go and see this land the first day you have a chance and see the

Beauties and Advantages of the Situation.

FIRST.-They are on the sunny side of Pine Hill, so situated as to have the cold north and east winds completely cut off, making the air soft and balmy;

SECOND.-They are in a natural valley and park. The Red Granite, which is looming up as a most desirable building stone, is quarried on the north side, furnishing work for many men, and which will soon employ thousands. This granite is fast gaining popularity in the building and monumental markets.

THIRD .- This land is approached by drives from Braintree on the east, Willard street on the west, and from West street on the north; also from South Braintree

A BEAUTIFUL SHEET OF WATER, COVERING 50 ACRES,

lies not far away to the south, belonging to the Quincy Water Company. The Old Colony sand pits, with their sidings, are not far distant. A natural spring of abundant water, pure and sparkling, is flowing through the grounds, making it easy to obtain water in building and for domestic uses, until a well is dug. Water free to all. Plenty of sand and building stone very near the grounds. No grading to be done; no rocks to be taken out; only to of his own marriage, build your cellar and erect your house thereon.

Another reason why you should buy at once:

It is only 15 minutes' walk from South Quincy, and soon it is expected that the E. Farrington. Mrs. T. A. Whicher, Mrs. railroad will have a station at the foot of Liberty street, on the branch road from West Quincy to Braintree, making it just as accessible to people going to Boston as Quincy; and within five minutes' walk over the hill from this station lies Sunny Side Park, one of the prettiest, healthiest and most desirable homes for the workingman. It is expected that from twelve to fifteen houses will be built at Sunny Side Park in the spring.

Gall Early and secure a Corner Lot for your future home.

SUNNY SIDE PARK CANNOT BE BEATEN FOR BEAUTY OF LOCATION.

Plans can be seen at Quincy Depot; C. F. Carlson's, Quincy, and Quincy Adams Depot.

ELECTRICS WITHOUT NOISE.

Important Inventions by John Christiansen of Quincy.

Two important electric car inventions have just been made. One does away with the noise, which is now such an objection to electric cars; the other applies to the wheel, which, with the new patent, runs equally well, whether the tracks are coated with ice or not.

The inventor is Mr. John Christiansen of Quincy, and his inventions have stood the test of snow and ice the past few days with remarkable success on a car especially the efforts were successful if numbers built and run on the Quincy & Boston

The motor is the same as that heretofore used, but the driving mechanism is a radical new departure, expensive and noisy gears being practically eliminated. Further, instead of each pair of wheels being driven by a separate motor, all the wheels are driven simultaneously by one small motor.

The wheels themselves have serrated rims, and, in connection with the rest of the mechanism, make it possible to operate, even when the rails are covered with ice and snow .- Herald.

Christ Church Sleigh Ride.

About twenty of the choir boys in charge of Mr. Packard left the Parish house about eight o'clock last evening in Mr. J. T. French's large sleigh for a trip to Mattapan and about Milton, returning at ten when they did full justice to an oyster chowder prepared for them.

The adult choir of about twenty-six left about the same time in Crane's six-horse chariot sleigh, arriving at Hotel Belmont Brockton, about ten where they partook of an excellent oyster supper after which they entertained themselves by singing and dancing in the hall connected with the hotel, leaving at midnight, arriving at Quincy at 2.30. Prof. Wrigley the organist, and Rev. Mr. Cotton and wife accompanied the party.

Schenkelberger, C. H. Porter, Jr., G. E. Farrington, H. R. Holden, J. D. Whicher and W. J. Franklin Faxon and Mrs. E. C. Stanwood were the matrons. The management forgot to extend the usnal courtesies to the press, therefore those present and the gowns worn do not appear.

railroad appeared before the legislative committee on railroads Tuesday in favor of allowing steam railroads to use electricity as a motive power, etc. Mr. Choate's idea was that electricity had been so far advanced during the past few Owen. years that it now appeared necessary that the leading railrord companies should be allowed to experiment with it both as a motive power and for heating. No one else appearing either for or against the petition, the matter was postponed for one week.

A brakeman on the Fairhaven branch of the Old Colony railroad having about two hours to wait at Tremont the other day thought he could best improve the time by visiting his sweetheart, who lived a short distance up the track. When it was time for the train to start the brakeman had not put in an appearance, and, as reported, whistling would not bring him the train was backed up to the lady's house and the brakeman told that it was time to cut his

Once in four years the ladies have an

pportunity to assert their rights, assume their authority and show what they can do in the way of entertaining. During the past two years the ladies of Atlantic and vicinity have been subjected to the will of the Atlantic Social Club for amusement. How well the members of this organization have succeeded in furnishing amusement, all who have attended the hops given by them during the past year and a half can hold up both hands in testimony of their appreciation.

Hardly had this new year come in when the ladies began to realize that it was "Leap year" and that the time had come for them to return the compliment and amuse the gentlemen, and a leap year party was proposed. To propose meant to carry out, and plans for a grand ball have been in preparation. No efforts were spared to make the affair a success, and count for anything.

in the near future.

The order opened with a waltz, the secand number being a quadrille. At this dance, in case the ladies might bave forgotten themselves, the prompter entered a gentle reminder that this was leap year and that when he said ladies he meant gentlemen and when he said gentlemen he meant ladies. This they tried to remember but could hardly accustom themselves to it and the natural mistakes made, rather than ruffling the party, served to cause merriment and put the party in good humor and it is safe to say that one and all enjoyed themselves to the utmost.

During a brief intermission Hendrick of Neponset served ices in the lower hall. The picture above designed especially for

The best thing to do is this: when you're suffering from Sick or Bilious Headaches, Constipation, Indigestion, Bilious Attacks, or any derangement of the Liver, Stomach, or Bowels, get something that relieves promptly and cures permanently. Don't shock the system with the ordinary pills -- get Dr. Pierce's Pleasant Pellets.

They're the smallest, for one thing (but that's a great thing), and the SOUTH QUINCY-Quincy Adams Depot easiest to take.

They're the best, for they work in Nature's own way—mildly and gently, but thoroughly and effec-

They're the cheapest, for they're guaranteed to give satisfaction, or your money is returned. You pay |= only for the good you get. What more can you ask?

But don't get something that the dealer says is "just as good." It may be better for him, but it's pretty certain to be worse for you.

Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is slrictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Grippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all dis cases of Throat and Lungs, succumb t the marvellous natural potency c AERATED OXYCEN. It is the new medicine of nature herself.

Bessie's Opinion. Bessie went to church that morning; She had never been before.
"But she's old enough," said mamma
"Three years old, and almost four."

She had promised to be quiet; "No, indeed, she wouldn't cry!" Holding tight to papa's finger, Off she went with sparkling eye.

Wonderingly she saw the people, Saw the flowers and the rest; Gazed up at the lofty arches,

But the music pleased her best. When it ceased and came the sermon, Bessie frowned and fidgeted.

"Sh! be quiet, Bess!" said mamma, But she shook her little head, Stood upon the red pew cushion,

Waved her hand in queenly way

A COWARDLY ASSAULT.

Two Roughs Murderously Beat a Man. Injuries May Result Fatally.

LYNN, Mass., Feb. 15.—Joseph (alias "Dipper Hole") Welch and George W. Southworth were arrested yesterday for an alleged murderous assault upon Lawrence Mullen of North Saugus. Mullen is employed in the Belmont, a road house in North Saugus, on Spring street, an avenue intersecting the Newburyport turnpike. Welch and Southworth visited the Bel-

mont about two months ago, and after their departure a carriage whip was reported missing. The next visit Welch paid the house Mullen accused him of stealing the whip. This angered Welch, who then stated that he would square accounts with Mullen at the proper time. Last Saturday Welch and Southworth again visited the Belmont in quest of

Curious Discoveries in the Room of a Recluse After His Death.

NEW YORK, Feb. 15.-Henry Tenbroeck Gamage, 87 years of age, a recluse and lassmate of ex-Senator Evarts at Yale was found dead yesterday in his room in the building of the University of New York, where he lived for forty-nine years. Death was due to natural causes. The body was found with the head resting on the top of a lighted oil stove and the flesh of the face was burned off to the bone. Very little is known about the man. No

one was permitted to enter the room. His barn-like apartment, which was illuminated only by a skylight, was filled from floor to ceiling with paintings and never was a more unjust act committed. portraits in rusty frames. Great Minds Run in the Same Channel. The approach of fly time suggested an idea to a man in Nebraska for a cow tail holder. A clamp like a clothespin catches the bushy end of the tail, and two cords with a snap attachment fasten the tail to a cow's leg, to a post or to the milking stool. The same day that the Nebraska man got his patent for a cow tail holder a man in Maine got one for the same purpose. The Maine man's tail holder is of a single piece of wire coiled so as to connect the tail with the cow's leg.—Harper's Young People.

preciated by the world, and now AERATED OXYCEN nishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is a rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Grippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all discases of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. It is the new medicine of nature herself.

QUINCY BABIES OF 1891.

1890, and 200 Over 1887.

There's no getting on without 'em, but they are a care and trouble, One baby beats a monkey, and a pair of twins counts double; From the present early period of pap and ceaseless squalling, Right through their most annoying days of unrestricted crawling, Up to the time when they begin to strut in cuffs and collars, And want to go to college and to spend their daddies' dollars, There is no peace for any one who tackles baby raising—And yet the lot of fun they are is certainly amazing."—Puck.

Today we present the statistics concerning the "little ones" who have been ushered to the world in Quincy during the year 1891. May they live to grow up to useful where. men and women; and as their parents grow old and feeble, may they be ever ready and villing to lighten the burden which they have to bear in old age.

The record of births in Quincy as kept by City Clerk Spear, show a remarkable in rease. The number recorded in 1891 was 649, an increase of 99 over the year 1890. When we take into consideration that during the past year there has been over two irths to every death, it will be readily seen that Quincy is growing very fast.

Of the total number, 331 were males and 311 females, and in seven cases the sex is ot given. The largest number to be born in any one month was 67 which was in eptember, while the smallest number in any month was 40 in April. Seven wives resented their leige lords with twins, and in several cases children were born of egitimate parents.

Following is a summary of the births by months for the past five years:

A Malicious Report.

That the scoundrels are not all dead yet s shown by the following. Under the head of deaths in Monday, Feb. 8th papers there appeared the following notice. REYNOLDS—At Atlantic, Feb. 7, suddenly, Mrs. Cora A., wife of Mr. Louis Reynolds of Boston, aged 30 years and

Relatives in New York and other places who saw the notice were shocked to hear of the sudden death of their relative, and lost no time in hastening to Atlanti Arriving there their surprise can be better imagined than expressed, when they found

that Mrs. Reynold was not dead but alive and well, not having even been sick. Mr. Reynolds lost no time in visiting the office of the Boston dailies, to learn where they received their authority for the publication of the notice. In this he was partially successful. He ascertained that the notice came in a letter that was post-

marked "Atlantic," which read as follows: "Please insert the enclosed under the head of deaths." A. H. FLINT. Who A. H. Flint is, Mr. Reynolds does know, and the name is probably fictitious, as no such person is known in Atlantic. The strange part of it is, that the anthor whoever he or she was, was thoroughly

acquainted with Mr. Reynold's family as the name and age given was correct. Mr. Reynolds will make every effort to race the letter to its author, who if found

will be prosecuted. We are pleased to say that Mis. Reynolds is enjoying her usual good health and has came on to attend her funeral.

Leap Year Party.

A number of well known Quincy young ladies gave a leap year party to their gentleman friends at Faxon hall, Monday evening. The party was a very select one and the costumes of the ladies were very pretty and becoming, while the gentlemen ooked charming in their full dress suits.

Dancing commenced at 8 o'clock, music being by Wilson's orchestra. The grand narch was led by Miss Nellie Ring and Mr. Henry McDonnell. The reception committee comprised Miss

Nellie Ring, Miss Alice Ring, Miss Sadie Clark, Miss Eva Biganess and Miss Mary

The matrons were Mrs. George Cahill, Mrs. M. C. Ring and Mrs. John Clark. Ices were served during a brief intermission by Caterer Wales.

Christian Endeavor at Atlantic. The East Norfolk Christian Endeavor Union held an enthusiastic meeting with the Atlantic society in Memorial church, Monday evening. Delegations were present from the societies in Quincy, Wollaston, Braintree, Holbrook and Randolph. The new society connected with the Baptist church, Wollaston, was admitted to membership. After a short business session, a model prayer meeting was held under the lead of the president of the union, Mr. W. G. Thompson of Wollaston, with Miss Daisy Bemis at the piano. Then followed a sociable, during which the social committee of the Atlantic society served refreshments to all.

> The Report of the Minority Members of the committee on coinage, weights and measures against the passage of the Bland free coinage bill, is signed by Messrs. Tracey of New York, Taylor of Illinois, Stone of Pennsylvania, Williams of Massachusetts, and Johnson of North Dakota. The minority in the report review the silver question, protest vigorously against the Bland bill, and recommend the passage of a measure authorizing the president to in vite an internal monetary conference. The report says that the first eight lines of the Bland bill develop its true purpose. They provide for two different dollars and a compulsion upon the citizens to receive either in payment of debts due him. It

It does not require any knoweldge of mone-tary or financial views to demonstrate that the compulsion of the legal tender power must force upon the creditor a cheaper and debased dollar. Few debtors will pay 100 cents to dis-charge their obligations, when 70 cents will suffice in law. This bill converts all existing government paper into paper which may be paid in silver, and leaves no paper which mus band in short, and reaves no paper which must be paid in gold. It is evidently intended to clear away all obstructions in the form of pledges to pay gold, and, without a distinct declaration of repudiation, to provide an easy track on which we may descend to the silver onometallic standard.

Because it is not acceptable money this bill lion, and pay for it 50 per cent. more than its present market value with a coin note which will be redeemable in gold so long as we main-tain both metals in circulation at a fixed

silver in the market, concluding with the others comment: "There can be no doubt of the urpose of a majority of the committee to orce a depreciated dellar on the ountry," and then goes on to say that the danger is not great of an avowed value of its own promises. It also says:
We shall never openly repudiate our debte or corrupt the medium of payment; the dan-ger lies in legislation such as this bill prooses which shall make the government unable to maintain its promises and tokens on the basis upon which they have been accepted. That basis is the dollar which is changeable ow here, exchangeable everywhere; which bes not give up 30 cents at our border, nor yield anything to fire or water

The Dollar of Gold. The minority contend that the bill prethat the effects of the bill will be "that the mints of this country shall receive all the silver which may be sent from any quarter for coinage into dollars, sixteen of which shall be convertible into one gold

After reviewing the history of modern monetary changes, and making the contention that the consent of nations makes and unmakes money, the minority state authorized to investigate the effect on dollar standard under the Bland bill, is an says the committee will take up the matter ver bullion to the price represented by the option bill. The committee will make ratio of sixteen to one between silver and report that will cover every phase of the gold. This price, it is stated, is \$1.29 14 an tariff question as it affects agriculture.

The minority argue that the Bland bill will bring silver from foreign countries The United States is the only source of upply to Europe, and our gold, by virtue of the bill, becomes available to take the place of unstable silver. Silver coming from abroad would, it is held, destroy the gold standard.

After arguing that the legislation has failed to raise the price of silver, the minority comment on the

Effect of a Silver Standard in the following vigorous language: The adoption of single standard, then, would place the dollar unit at once at the mercy of he silver bullion market, and obligations outstanding, incurred upon the gold basis would be payable in a depreciated silver dol ar worth only what the world should think it to be worth at a given point of time. Thus o depreciate our standard of payments is learly partial repudiation and unqualifiedly

The second section of the bill reported by the majority of the committee is a confession that the purpose of the bill is to place the United States upon a silver monometallic standard, To those who are willing to accept a silver standard in this country, which must nvolve a degree of repudiation of existing ob-igations, there can be no answer made except that it is dishonest and fradulent; and from such a moral standard there is no appeal save to the moral sense of the people.

As to the Effect of the Bill the minority says that to depreciate by 30 or 40 per cent. the values of savings banks securities, which it is claimed the bill will do, would rob millions of our industrious citizens of their hard earned savings. The revenues of the government will be depreciated in like manner, and every dollar received in duties and other taxes will represent about two-thirds the amount now fixed by law.

The minority makes a strong plea for an international monetary conference as the only means of settling the question fairly, and concludes with an argument in substance that the bill is unwarrantable to risk, and is without advantage to the country.

Appended to the report is a bill authorizing the president to invite an international monetary conference.

preciated by the world, and now AERATED OXYGEN furthe process by which such wonderful cures are being wrought. By this perfectly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is a rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by leadly germs. La Crippe, Catarrh, Consumption, Asthma. Licenses at Public Resorts-Councillor

Election-The Governor's Salary. Boston, Feb. 17.—The committee on liquor laws sent a bill to the house to enlarge the opportunities of summer resorts in the commonwealth for engaging in the liquor traffic. It provides that in towns of less than 5000 inhabitants, whose population is temporarily increased during the summer months, may apply to the commissioner of statistics of labor for a special enumeration to be made in June. Based on that census the town may issue licenses to extend from June 15 to Sept. 13, for every 500 inhabitants, if the voters have previously voted in favor of license. A gentlemen whose days are spent in the City Hall purchased some stock in the Lone Star Cotton Picker Company. He mentioned his investment to a friend, also in the employ of the city, advising him to purchase. Before doing so the friend decided to further investigate, and wrote to Waco, and received the following letter in

Waco, Tex., Jan. 20, 1892. Ir. — —, Boston, Mass. DEAR SIR,—Your letter of the 24th inst., addressed to our Waco postmaster respecting the Lone Star Cotton Picker, has been referred to me, with a request by Mrs. Conger, Postmistress, to answer it. I have witnessed the cotton picker a work in the cotton fields from the time i made its first tests here until its present

Nothing can pick cootton cleaner or the ordinary hired cotton picking by hand, but the ordinary hired cotton picker will leave from 5 per cent. to 15 per cent. of the cotton in the field, and pick it more or less than 5 per cent. unpicked. It picks as fast as two horses walk ordina-

The machine has picked as high as 4000 pounds per day. Two horses and one driver can operate it. It makes as good sample and grade as that picked by hand the rains throw or spatter more or les dirt or mud on the opened cotton, which dries on it and is gathered in the hand-picked cotton; but the Lone Star Cotton Picker knocks all of this dirt out in pick ing the cotton, a thing not possible to be done in hand-picked cotton.

The machine does not injure the plant. I have seen it pick when the cotton was just opening, and always in that case the plant has blooms and fruitage in all stages, up to nature-opened cotton, and it destroys no more green bolls or blooms than would be knocked off by a hand going over the

It is the uniform testimony of all who have seen the machine pick cotton, and hundreds of practical farmers have seen it at work, that it is a success; it is beyond doubt the greatest invention of the age The company has a plant here worth about

\$50,000.

I have been connected with the press of Texas about 23 years; resided in Waco for 37 years. I have known the president of the company, Col. Gurley, and one of the directors, Dr. Sears, for all of these years. The State of Texas has no more honorable nor upright gentlemen than they. I have known the inventor, Mr Campbell, and Mr. Turner, the secretary of the company only since their residence in Waco. They came from Chicago to Waco about two years since. Col Gurley and Dr. Sears

have resided in Waco since 1854.

Outside of \$500 in stock I own in the company, I have no interest. I have doubted its ultimate success from the time I first saw it. Very truly, J. K. STREET.

Beauties and Advantages of the Situation.

FIRST.—They are on the sunny side of Pine Hill, so situated as to have the cold north and east winds completely cut off, making the air soft and balmy;

SECOND.—They are in a natural valley and park. The Red Granite which is looming up as a most desirable building stone, is quarried on the north side, furnishing work for many men, and which will soon employ thousands. This granite is fast gaining popularity in the building and monumental markets.

THIRD.—This land is approached by drives from Braintree on the east, Willard street on the west, and from West street on the north; also from South Braintree

BEAUTIFUL SHEET OF WATER, COVERING 50 ACRES,

lies not far away to the south, belonging to the Quincy Water Company. The Old Colony sand pits, with their sidings, are not far distant. A matural spring of abundant water, pure and sparkling, is flowing through the grounds making it easy to obtain water in building and for domestic uses, until a well is dug. Water free to all. Plenty of sand and building stone very near the grounds. No grading to be done; no rocks to be taken out; only to build your cellar and erect your house thereon.

Another reason why you should buy at once:

It is only 15 minutes' walk from South Quincy, and soon it is expected that the railroad will have a station at the foot of Liberty street, on the branch road from West Quincy to Braintree, making it just as accessible to people going to Boston as Quincy; and within five minutes' walk over the hill from this station lies Sunny Side Park, one of the prettiest, healthiest and most desirable homes for the workingman. It is expected that from twelve to fifteen houses will be built at Sunny Side Park in the spring.

Call Early and secure a Corner Lot for your future home.

The road led through a stretch of woods, crossed a shallow creek and gradually ascended to the summit of the long, low hill where it branched, one fork leading back into the country, where it merged into the broad country road and the other diverging to the left and following the crest of the elevation to the old Beverley homestead. Into this Anthony turned, following it even in the dusk with the assured step of a man to whom the way is familiar. After a little he peered about him for a small gate which he remembered used formerly to admit pedestrians to the orchard through which a path gave a short cut to the house. It was still there, and as he raised the latch with one hand he lifted the whole gate slightly with the other; it had always sagged ; little and been hard to open; it sagged still.

preciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is a rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving affuence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by leadly germs. La Crippe, Catarrh, Consumption, Asthma. NO CAUSE FOR ALARM.

Government Can Meet Obligations With out Touching the Gold Reserve.

WASHINGTON, Feb. 18.—Secretary Fos ter says that there is nothing in the finan cial condition of the treasury to cause the least uneasiness, and it is silly to suppose that he contemplates the use of the \$100, 000,000 gold reserve to meet the current ob ligations of the government. While the present net cash balance of \$27,500,000 consists almost entirely of subsidiary coin and money on deposit with national banks, it does not include the national bank redemption fund of \$5,500,000 and disbursing officers' balance amounting to \$25,000,000, both of which funds are subject to the action of the department and should not be regarded as "demand lia-evening."

GLADSTONE'S PLANS

Criticized by Balfour, Who Finds No Good in Them.

SNOW IN GREAT BRITAIN

Causes Much Inconvenience Throughout the Country-Horrible Crime of a Berlin Woman - Election Riots in Japan-Russians Waking Up.

LONDON, Feb. 19. - The Constitutional club gave a banquet last night in honor of Mr. Balfour. The club has a membership of 6550. The Earl of Limerick presided and there was a large and aristocratic company present.
Mr. Balfour made a speech which was

enthusiastically received. He said that

beside their inability to define their Irish policy, the Gladstonians were in a diemma. They had made one set of promes to the English electors and another to the Irish electors. The question was: Who would be cheated? Who would be the dupes? He believed the general election would show that the patience of the English electors had been exhausted. If the home rule bill was carried the Irish members would be so many soldiers of fortune supporting any government willing to extend the already undue limits granted by the bill to an Irish parliament. The Gladstonians brought no pressure on the government to dissolve parliament. In fact they dread nothing more than a return to power with a majority dependent on the Irish party.

THE JAPANESE ELECTIONS

Attended with Riots and Bloodshed.

Many Persons Reported Killed. YOKOHAMA, Feb. 18.—Dispatches from various places throughout Japan show the elections for members of the house of rep resentatives have been attended with man disturbances. In Ogi all the male inhabi-tants became involved in a riot. The polic several times charged the rioters, but were each time repulsed and a number of them were quite severely injured. At Saga, where serious riots were reported Tues day, several persons were killed. In consequence of the trouble at Saga the government has ordered that the elections

depth of from twelve to sixteen feet in the Semmering and Hochveitsch passes. A large number of cottages in Styria are alm st buried. The weather has moder ated and a thaw set in. This has caused the utmost alarm among the people dwell ing on the lower Alps and in the mountain hamlets, as it is feared much destruction will be caused by avalanches.

Five Heroes Killed. LILLE, Feb. 18. -A fire broke out here in a drapery store. SUNNY SIDE PARK LANDS,

RED STONE VALLEY, On Braintree and Quincy

These lands have been made into house lots, thus opening up a large tract of land, most desirable to the workingman, and at prices so low that every man should have a lot and make a home for himself and family. Go and see this land the first day you have a chance and see the

lies not far away to the south, belonging to the Quincy Water Company. The Old Colony sand pits, with their sidings, are not far distant. A natural spring of abundant water, pure and sparkling, is flowing through the grounds making it easy to obtain water in building and for domestic uses, until a well is dug. Water free to all. Plenty of sand and building stone very near the grounds. No grading to be done; no rocks to be taken out; only to build your cellar and erect your house thereon.

Another reason why you should buy at once:

It is only 15 minutes' walk from South Quincy, and soon it is expected that the railroad will have a station at the foot of Liberty street, on the branch road from West Quincy to Braintree, making it just as accessible to people going to Boston as Quincy; and within five minutes' walk over the hill from this station lies Sunny Side Park, one of the prettiest, healthiest and most desirable homes for the workingman. It is expected that from twelve to fifteen houses will be built at Sunny Side Park in the spring.

Gall Early and secure a Corner Lot for your future home.

Above the overseer's house—a neat building of hewn logs with a rough porch in front, and still in a good state of preservation.

It had been occupied by a family of white tenants at the time when this portion of the Beverley plantation passed into other hands; but the lawyer, in obedience to instructions received from the new proprietor, had moved them prehensively. out and had the house done up a little. Not that Ned Anthony cherished any sentiment connected with the house in which he had been born; on the contrary, he considered it emphatically "a dog hole;" but he was a practical fellow and well used to roughing it, and thought that the "old shanty" would do well enough to live in for a month or so while he should run up a decent house;

that is, if he should decide to make any sojourn in Virginia. Anthony stood in one of the rooms, whistling softly and looking about him one morning about a week after the night on which he had renewed his acquaintance (as he thought) with his old playfellow through the parlor window. The next day he had gone down to Richmond to order some things he needed for his temporary establishment and to talk to a contractor about putting up a house for him in case he should decide to "stop on the ranch" for a year or so. He was

He had not cared for them greatly, and it was no distress to him to know that they were dead. But his mother was different. She had been the one human creature he had loved unselfishly-besides little Mary Beverley. He was thinking of her, of his grief at running away from home to seek his fortune, and all the old time matters, when he was aroused by hearing a voice outside. It was a clear, full voice, softly modulated and its intonation was very pleasant—unmistalcably the voice.

By this perfeetly natural process the respiration tract is reached to its lest cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is a rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Grippe, Catarrh, Consumption, Asthma. SUNNY SIDE PARK LANDS.

RED STONE VALLEY, On Braintree and Quincy Line.

These lands have been made into house lots, thus opening up a large tract of land, most desirable to the workingman, and at prices so low that every man should have a lot and make a home for himself and family. Go and see this land the first day you have a chance and see the

Beauties and Advantages of the Situation.

FIRST .- They are on the sunny side of Pine Hill, so situated as to have the cold north and east winds completely cut off, making the air soft and balmy; so desirable in this climate.

SECOND.—They are in a natural valley and park. The Red Granite, which is looming up as a most desirable building stone, is quarried on the north side, furnishing work for many men, and which will soon employ thousands. This granite is fast gaining popularity in the building and monumental markets.

THIRD.—This land is approached by drives from Braintree on the east, Willard street on the west, and from West street on the north; also from South Braintree

les not far away to the south, belonging to the Quincy Water Company. The Old Colony sand pits, with their sidings, are not far distant. A natural spring of abundant water, pure and sparking is flowing through the grounds Water free to all. Plenty of sand and building stone very near the grounds. No grading to be done; no rocks to be taken out; only to build your cellar and erect your house thereon.

Another reason why you should buy at once:

It is only 15 minutes' walk from South Quincy, and soon it is expected that the railroad will have a station at the foot of Liberty street, on the branch road from West Quincy to Braintree, making it just as accessible to people going to Boston as Quincy; and within five minutes' walk over the hill from this station lies Sunny Side Park, one of the prettiest, healthlest and most desirable homes for the workingman. It is expected that from twelve to fifteen houses will be built at Sunny Side Park in the spring.

Call Early and secure a Corner Lot for your future home.

SUNNY SIDE PARK CANNOT BE BEATEN FOR BEAUTY OF LOCATION.

"who said we were paupers?" fired Hector. "It's a lie!"

"So 'tis," acquiesced Ran pleasantly, "if not having things is being paupers. But you must not say it's a lie, Hec, because 'twas Aunt Neelie that said it. She said it when mamma told her that the gentleman had come that bought the land, you know-grandpa's land and father's. She cried when mamma told her, and said the Beverleys were paupers and that mamma didn't care one bit and was glad the land was gone, because she wasn't a Beverley.'

"She is a Beverley," asserted Hector; "and I'm going to have the land back when I get to be a man. I m going to work hard and make a lot of money, and ask the gentleman to let me have it back; and I know he will, because he won't love it like we do. The listener inside smiled to himself. Prosperity had departed from the old family, and they felt the change; he had thought they would, when he saw the land advertised. He had not bought it himself to gloat over their downfall and why he had bought it. Perhaps he was a little influenced by the feeling that the land had better be in his hands than in those of strangers; perhaps it was only a passing whim, but anyhow he had bought it, and, while he knew perfectly well that it was a poor investment for his money, he was not sorry that he had These boys were Hector Beverley's sons of course; indeed, their must be his former object of detestation

SUNNY SIDE PARK LANDS.

RED STONE VALLEY, On Braintree and Quincy

These lands have been made into house lots, thus opening up a large tract of land, most desirable to the workingman, and at prices so low that every man should have a lot and make a home for himself and family. Go and see this land the first day you have a chance and see the

Beauties and Advantages of the Situation.

FIRST.-They are on the sunny side of Pine Hill, so situated as to have the cold north and east winds completely cut off, making the air soft and balmy;

SECOND.-They are in a natural valley and park. The Red Granite, which is looming up as a most desirable building stone, is quarried on the north side, furnishing work for many men, and which will soon employ thousands. This granite is fast gaining popularity in the building and monumental markets.

THIRD.—This land is approached by drives from Braintree on the east, Willard street on the west, and from West street on the north; also from South Braintree

BEAUTIFUL SHEET OF WATER, COVERING 50 ACRES,

lies not far away to the south, belonging to the Quincy Water Company. The Old Colony sand pits, with their sidings, are not far distant. A natural spring of abundant water, pure and sparkling, is flowing through the grounds making it easy to obtain water in building and for domestic uses, until a well i dug. Water free to all. Plenty of sand and building stone very near the grounds. No grading to be done; no rocks to be taken out; only to build your cellar and erect your house thereon.

Another reason why you should buy at once:

It is only 15 minutes' walk from South Quincy, and soon it is expected that the railroad will have a station at the foot of Liberty street, on the branch road from West Quincy to Braintree, making it just as accessible to people going to Boston as Quincy; and within five minutes' walk over the hill from this station lies Sunny Side Park, one of the prettiest, healthiest and most desirable homes for the workingman. It is expected that from twelve to fifteen houses will be built at Sunny Side Park in the spring.

Call Early and secure a Corner Lot for your future home.

SUNNY SIDE PARK CANNOT BE BEATEN FOR BEAUTY OF LOCATION.

reciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such won cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and rocts it out It is a cure that is strictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Grippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all diasses of Throat and Lungs, succumb to the marvellous natural potency of AERATED OXYCEN. 18th century came to its close. Thirty years later it was no longer so. The granite railway was built in Quincy in 1826; the first Massachusetts railroad company incorporated in 1830. These events marked epochs. "The long period from 1640 to 1830 was, therefore, with the Massachusetts towns the primitive period that of formation. Though it led directly to the present, it had

little in common with the present. Nevertheless, during that period five generations lived on the soil and were buried in it. Concerning them there was, as a rule, little more to record. A simple, laborious, unaggressive race they were born and died; each following generation much the same as the generation which preceded it.

"Wealth and population increased slowly. With vessels of the same build they fished familiar seas; with similar utensils they cultivated the same fields; they dwelt in houses built on an identical plan, and preserved the old domestic and social customs. The outer world made itself little felt in the remote village community, and the village community in no way influenced the outer world.

"Few elements of change existed, and accordingly little change took place. The ERECTED IN THE YEAR 1732, AND REPLACED BY THE PRESENT EDIFICE Quincy of 1830 was only the Braintree of 1640, a little more thickly peopled and a little more prosperous."

Town Business.

"Prior to 1810," says Mr. Adams, "all business had been done in a loose, unsysteingly the sole church of the Braintree of matic way. church of the town; from 1708 to 1792 it changes, scarcely affecting to a degree out-statesman in his way because the field was small. As a public man generated by the New England town system, Mr. Greenleaf was a type in the first 30 years of the 19th century, as John Quincy was in the 17th or as Edmund Quincy was in the 16th.

"The years between 1810 and 1830 were in Quincy the golden period of the old Massachusetts town government. In the latter year the annual appropriation was \$4,500; 45 years later the appropriation was \$116,000, and the number of articles in the warrant had swollen from 6 to 45. The character of the town meetings also had changed. In place of the few score rustics following the accustomed lead of the parson and squire, an easily managed body, there was met a heterogeneous mass of men numbering hundreds, jealous, unacquainted and often in part bent on carrying out some secret arrangement in which private interest overrode all sense of public welfare."

This condition of things, Mr. Adams claims, was the cause of Quincy giving up the old form of town meetings and becoming a city.

Quincy Granite.

The quarries began to be worked about the time of the incorporation of the town, and Quincy has grown as these have developed, but of late the favorable situation of the city has added a new stimulus as a suburban home for business men of Boston. Beauties and Advantages of the Situation.

FIRST.—They are on the sunny side of Pine Hill, so situated as to have the cold north and east winds completely cut off, making the air soft and balmy; so desirable in this climate.

SECOND.-They are in a natural valley and park. The Red Granite, which is looming up as a most desirable building stone, is quarried on the north side, furnishing work for many men, and which will soon employ thousands. This granite is fast gaining popularity in the building and monumental markets.

THIRD .- This land is approached by drives from Braintree on the cast, William street on the west, and from West street on the north; also from South Braintree

lies not far away to the south, belonging to the Quincy Water Company. The Old Colony sand pits, with their sidings, are not far distant. A natural spring of abundant water, pure and sparkling, is flowing through the grounds making it easy to obtain water in building and for domestic uses, until a well is dug. Water free to all. Plenty of sand and building stone very near the grounds. No grading to be done; no rocks to be taken out; only to build your cellar and erect your house thereon.

Another reason why you should buy at once:

It is only 15 minutes' walk from South Quincy, and soon it is expected that the railroad will have a station at the foot of Liberty street, on the branch road from West Quincy to Braintree, making it just as accessible to people going to Boston as Quincy; and within five minutes' walk over the hill from this station lies Sunny Side Park, one of the prettiest, healthiest and most desirable homes for the workingman. It is expected that from twelve to fifteen houses will be built at Sunny Side Park in the spring.

The Democrats of New York recall with proud memory the inflexibly sound finance of taking from the wages and profits of our in dustrial tolling millions by subsidies, bountie proud memory the innextory sound unance of Governor Tilden, who not only administered the state government with frugality, but who also, with unequalled ability and unflagging resolution, demanded a thorough reform of tariff taxation, and likewise, with a statesand enhanced prices, a stupendous inc for the wealth of the employers of less than 7 per cent of all our people The Sherman silver law now transforms the federal coinage power of silver and gold, into an instrument man's energy and foresight, assailed the shameless degradation of our greenback currency, and led the Democratic party in pushing on the compulsory Republican advance to a current coin redemption, if not also to that for the gradual expulsion of our gold, for the establishment of an exclusive basis, and for the permanent reduction of every America the permanent reduction of every American dollar by 30 per cent. or more below the level of its true value during the whole period of our free bi-metallic coinage from 192 to 1873. The demand for repeal of these edicts of the billion dollar congress has extorted from Re publican leaders their published purpose to refuse repeal. The demand for the repeal of the McKinley act is a proposal of the largest The Democrats of New York refer with The Democrats of New York refer with grateful pride to the inflexibily sound finance of Governor Hill, who, by efficient economy throughout his long administrative career, has accomplished the practical extinction of our state debt, has faithfully urged with a powerful and practical advocacy the nation's release from the bondage of unequal, unnecessary and uninetrativation improved by the tariff, of these the McKinley act is a proposal of the largest measure of tariff reform, for it is a proposal to recover the whole ground usurped by the billion dollar congress. Repeal is not a proposal to stop at the tariff of 1883 as a finality. When the tariff of 1883 was the law of the land, in the hour of our defeat three years ago, I said: "The Democratic party nails to the meat the fine of tariff reform." This from the bondage of anequal, unnecessary and unjust taxation imposed by the tariff of 1883, and the repeal of the superadded impositions of the two McKinley laws; and likewise with a statesman's energy, and true foresight of the 70-cent dollar pushing for birth in the body of the Shapman silver law, has taken up the ago, I saut: The beautiful party from "Tariff re-the mast the flag of tariff reform." Demanding with him "that every dollar coined in these United States shall be the equal of every other dollar so coined, and demanding the redress of their present shameless inequality," the Democrats of New York, and the sacrifice of our solution with the wise and politic method of abolishing, whenever practicable, one after another, one indefensible tax at a time, were the two McKinley laws today replaced by the tariff of 1883.

-Hartford Times. Self Conceit versus Self Confidence. While conceit may produce a negatively agreeable effect it cannot be called a positive charm. We do not think a person more charming because of his conceit, and we do not encourage it in those who are dear to us. A parent represses rather than stimulates it in his child, and a person who should plainly and laboriously cultivate it would not be in peril of canonization. It is doubtful if conceit ever accompanies real greatness. A great man, indeed, may for the purpose of erecting a monument have the self confidence that springs from the consciousness of power; but Abbey. consciousness of power is very different from conceit of it. The one is a fact; the other a fancy.-George William Curtis in Harper's.

The third party, in dead earnest, was suddenly thrown into the convention by the report of the committee on credentials, seating Post and Branch, the two to shut out. Post, in the bitterest speech heard in the convention, denounced Contempting to hand over the Alliance in that state, bound hand and foot, to the Demothis accusation was intense, and scores of lelegates were running about and waving their hands like Bedlamites. After an

Exchange of Hot Personalities extraordinary confusion, participated by Moses of Georgia, Ellington, Branch nd others, the report of the credentials mmittee was adopted by a large majorv. a substantial triumph for the third artyites. The row among the Georgians tinued fiercely, however, and was only nded by the sergeant-at arms, club in and, forcibly jamming the warring southerners down in their seats. When quiet and been measurably restored, the list of nearly 150 members of the platform committee was finally completed and read.

The aunouncement of Post as the olatform committeeman from Georgia early started a personal encounter beween him and Moses, a fellow-Georgian. The convention, as a whole, was now horoughly disgusted with the Georgians nd plainly showed with hisses and cattalls. preciated by the world, AERATED OXYGEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by dead y germs. La Crippe. Catarrh, Consumption, Asthma. Beauties and Advantages of the Situation.

FIRST.-They are on the sunny side of Pine Hill, so situated as to have the cold north and east winds completely cut off, making the air soft and baimy; so desirable in this climate.

SECOND.—They are in a natural valley and park. The Red Granite, which is looming up as a most desirable building stone, is quarried on the north guilty" when called upon to plead. side, furnishing work for many men, and which will soon employ thousands. This granite is fast gaining popularity in the building and monumental markets.

THIRD.—This land is approached by drives from Braintree on the east, Willard street on the west, and from West street on the north; also from South Braintree

WRECK AND FIRE.

Mill Operatives Lose Their Lives Through the Collapse of a Chimney. LONDON, Feb. 25.-At Cleckheaton, a ollapsed yesterday and fell on the roof of the factory just as a number of young women operatives were leaving work. The wing of the factory on which the chimney fell was crushed into a heap of debris. The piteous cries of those caught in the ruins could be heard, and the horror of the Jumbo's Stubs from the West. scene was soon augmented by the breaking out of fire. Numbers of the imprisoned victims were more or less burned. The number already extricated includes twelve killed and many injured by having limbs crushed. Many persons are still missing. "Steeple Jacks" who were occupied in repairing the chimney, found it was collapsing and made their escape.

The cause of the disaster was the re- Golden Filling. moval of a number of defective bricks for the purpose of making repairs. Public censure is directed against the owners of the factory for permitting the large num-ber of employes to continue at work, knowing the dangerous condition of the chimney.

STARVATION, NOT DISEASE, Largely Responsible for the High Death Rate in Russia.

LONDON, Feb. 25.—The special correspondent traveling in Russia for the purpose of investigating into the famine situation, has written that he has returned to Saratov after a 300-mile drive through the valley of the Volga, where he went to inquire into the condition of the German colonists. The principal land owner, he says, does nothing to relieve the distress among the colonists. The grain which is given to them by the authorities does not last the alloted time, and many of the deaths that occur among the people are really due to starvation and not to disease, as is stated in the official reports. The City Council held its sixth meeting of the month on Thursday, this beating all other states send Cleveland delegates to records since Quincy became a city. There was a full attendance of the Councilmen, and quite a large attendance of citizens terested in the water question.

The Water Orders.

Under the head of unfinished business the orders of the Finance Committee relative to the purchase of the Quincy water works came up for its second reading.

Councilman Moxon moved to amend the second order by adding after the words March 23, A. D. 1892, "at the several lected as the date and that action was r polling places of the several wards of the affirmed.

Councilman Federhen said their were two ways of proceeding to obtain public works, and in order to bring both before the Council that members might choose, he offered the following substitute order:

ORDERED: That a meeting of the legal voters of this city be held on Tuesday, March twenty-second, 1892, at which meetquestion—Shall Chapter 401 of the Acts passed by the General Court in 1891, entitled "An act to authorize the city of Quincy to introduce a public water supply" e accepted? On the day of said mee the polling places shall be kept open from 6 o'clock in the forenoon and from that street; in Ward Three, Baxter's building, at yesterday. The presbytery made this corner of Franklin and Pearl streets; in announcement: Ward Four, House of Hose Company No. Six, House of Chemical Engine Company,

The Mayor is requested to issue a warrant for said meeting, and the City Clerk is directed to cause notice thereof to be posted and printed in the Quincy PATRIOT Advertiser and LEDGER. The sum of five hundred dollars is hereby appropriated (so much thereof as may be necessary to be expended) for the expense of said meeting, said sum to be charged to the appropriation for election expenses when made.

In support of his order Councilman Federhen said he had no wish to antagonize made but recognized two ways, one was by having a vote of the Council under the the people for ratification; the other was to submit the act of last year first to the people for acceptance or rejection. Personally he was not in favor of the Council voting to purchase the property until the people had first said they desired it. If they do say so, it will be our duty to carry out their will. He believed it the proper way to submit it to the people first. If the Council adopt the orders, all but that auuntil the citizens had voted. This order cuts at the very heart of the city charter. It is proposed to add to the officers of the city three commissioners, three more salaried officers. This is the first attempt to put some one in an office where there will be a divided responsibility.

In answer to a question by Councilman Sherman, Councilman Federhen said the acceptance of the Act of 1891 allowed it to go directly to the people.

Councilman Sherman-The acceptance of that Act gives them certain rights, but the purchase must then be submitted to the people.

Councilman Federhen-The substitute order provides for the acceptance of the Act of 1891.

Councilman Sherman-That means two elections? Councilman Federhen-Yes.

Councilman Sherman-The framers of

Public Works should be a \$5000 man. The City Council was opposed to such a high salaried official, therefore it was not wise to place the water works in that department. The salary of the water commissioners would not make up the difference. The visit of the ex-president to Michigan was full of conferences with leading Democrats, and the general opinion of the men who talked to Cleveland was that he should refrain from appearing as a "bolter." CITY CLERK SPEAR is acting Mayo during the absence of Mayor Fairbanks from the State. It is doubtful if he will take the responsibility to sign the orders passed by the Council, and therefore they must wait for the return of His Honor the first of next week.

THE STATEMENT in the City Council last evening, that Councilman Bryant probably received a free LEDGER, which explained his friendly stand for the paper, For Shirtings, was not probably said seriously. To correct any misapprehension, however, we would state that no Councilman or city official receives a free paper. affection for the ashcake of his boyhood which forbade the idea of his being a stranger in a strange land. Miss Cornelia stared into the fire, lost

in thought. There was some mystery about her enemy's antecedents she felt convinced, and she was determined to unravel it, and if possible to his confusion and overthrow. Her mind went hunting about with its nose to the ground like a hound on a cold scent. Presently it seemed to her to warm a little, and she threw up her head and gave tongue at once. "Mary," she said, turning in her chair

and regarding her niece solemnly, "my brother's overseer, the man who lived with him so many years and was with him at Shiloh, was named Anthony and he had a lot of sons. Perhaps this is one of them."

The solemnity of this announcement, which was made with the air of one loosing the seals and sending upon the earth pestilence and judgment, was almost too much for Mary's gravity. She bent her head over her sewing so that Miss Cornelia might not be offended by her mirth. Presently she remarked:

"I thought all the Anthony boys were killed, auntie. Hector said so, and they were in his regiment. He spoke well of them always-their gallantry, patience and endurance at a time when courage old Mr. Anthony, the father, saved my husband's life at Malvern Hill. He must have been a brave, unselfish man." "Yes, he behaved very well," assented

Miss Cornelia impatiently; she was not interested in that part of the subject. "Everybody was always saving somebody else's life in those days-that is, when they weren't all killing one another. That's war. Mr. Anthony was a respectable old man, shockingly slouch-16. "When Jeremiah was entered into him to usurp a considerable portion of ing and untidy. My brother thought a good deal of him, I remember. Never mind him though; it's the boys I want. What were their names? Lanky, slabsided creatures, and so many of themfour or five. Let me see; what were their names?" Miss Cornelia's brows contracted perplexedly, and her memory returned and grappled with the past.

Mary rose and crossed the room to an old fashioned secretary, bound and mounted with brass, and opened one of the drawers. Her fingers passed from one pigeonhole to another until she found what she was in search of-a small leather bound book, such as men sometimes carry in their pockets. With this in her hand she resumed her seat and began turning the pages rapidly. Miss Cornelia watched her, still striving to ensuare those elusive names with the mesh of recollection.

Mary found the page she was in search of, and ran her eye down it. "I can tell you, auntie," she said. "Hector kept an account of all his men, and, as near as he could, what became of them. The Anthony boys are all mentioned here. There were five of them. Hugh was killed at Sharpsburg. David was wounded in the fights below Richmond and died of his wounds in the hospital. Jim was captured, and died of prison fever at Point Lookout. Robert lost his life in a charge in the Wilderness; and Albert was shot at his post on picket duty in the Valley. A terrible list of casualties, but not uncommon for those times. Old Mr. Anthony died of typhoid fever the same summer that your mother did. There is the family history, auntie, and you must confess that it's a sad one Stay! I disliked it so my advice. I am but a cipher in the family; although it would be better if I was more heeded-better for the rest, I mean." Miss Cornelia paused to allow this reflection to sink into Mary's mind. "The boy ran away before the war,"

she presently resumed, "because he couldn't endure his stepmother, a tidy, respectable woman, who told me herself that he was past all human standing. Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all diceases of Throat and Lungs, succumb to the marvellous natural potency ci AERATED OXYCEN. It is the new medicine of nature herself.

DREW SMALL SUMS. Public and Private Ownership of Public

Works Discussed. At a recent meeting of the Sundown MOST DELICATE Club, of Omaha, Neb., the subject of the municipal control of public franchises was The only Scientific Production in the nature of a Polish that will keep your Gold discussed, and Mr. Andrew Rosewater, M. FULLY THREE TIMES AS LONG AS ANY OTHER PREPARATION KNOWN ship, he pointed out, received its first test in all that pertains to the public service in the city of Paris.

Aside from the economic questions involved, public ownership would, in the opinion of Mr. Rosewater, more than any other agency, destroy the corrupting influences in our municipalities, and indirectly BOOTS, SHOES and RUBBERS, in the Legislatures. He noted a feature in the statistics of water-works by which it appears that the ratio of number of taps to population which is 12 per cent. in the cities under public ownership is but 5 per cent. in the cities where the water-works are owned by private companies. This disparity is, doubtless, largely due to the fact that private companies supply the smaller and newer towns where consumers are inclined to stick to their wells, and where it is more difficult to compel the closing of wells and to require the general use of the private water company's supply, than where the public supply is owned by the municipality.

> While the general views upon municipal ownership as set forth in Mr. Rosewater's address are those which have been urged by the Engineering Record, we cannot approve his inferred explanation of the considerable difference in the ratio of water consumption shown by the statistics of publicly and privately managed supplies by attributing to the private water company illiberality in its extensions. A private corporation purchasing a franchise of this character enters upon the undertaking as a business enterprise, with the expectation of making a commercial success of it, either in selling water or in selling out the works. Its operations are conducted and are entitled to be judged upon a business basis, and with this view in mind it is unreasonable to expect the private company to expend a dollar for immediate prospective receipts of 75 cents. It is the public, however, which is the chief gainer by works of this character, and, in view of the general benefits conferred, it is not We sell our Groceries with your interest in only natural but proper that extensions of mind as well as our own. THE APPROPRIATION BILLS

Eaid to Be Making Good Headway in the House-Frye's Bill for the Benefit of Seamen-Order in Which the Tariff Bills are to Be Taken Up.

WASHINGTON, Feb. 27 -A prominent advocate of free coinage says that the west-ern representatives, especially from Indiana, who have heretofore indicated a willingness to postpone the question until after the presidential election, have announced their determination to stand by the Bland bill, and insist on an early consideration and a square vote on it. Nearly all of the anti-silver men were present and they were only able to muster about fifty votes all told. The free coinage advocates were largely in the majority and, had a The tool sharpeners and paving cutters vote been taken, would have carried their proposition directing the rules committee to report a rule fixing an early day, March 25, for the consideration of the silver bill by a two-thirds vote.

It looks now, according to this authority, as though no compromise could be effected, and that the free coinage advocates will insist that the consideration and discussion of the Bland bill shall be commenced not later than March 25. Although the Democratic senators were generally invited to be present at the caucus, there was but one present, Senator Butler, and he only remained a short time. A Reckless Statement.

To the Editors of the Daily Ledger: The reckless statement of Mr. John Fid. erhen in to lar's Patriot should not go unanswered, and I will do it briefly.

Even should the water works cost the extravagant figure named by him (\$750,000) the interest would not be "nearly \$50,000" but less than \$30,000, for there is no doubt little weight.

The works will not cost \$750,000, and rates will soon pay running expenses and interest, and the bonds when due, so that while the amount seems large, it will not be burdensome upon the taxpayers of a growing city like Quincy.

A Naples Donkey Barrow Story. A ridiculous incident is recorded by our correspondent at Naples. There is an asylum in that city for old people, in the service of which is used a small donkey barrow on which is inscribed the words "Little Sisters of the Poor," and which is generally used for collecting old gifts, from the sale of which the institute derives an income of about 20.-000 francs a year. The other day one of the paupers fell and hurt his head, and ing the death of Timothy Keough on Feb. was conveyed in the cart, accompanied

by two nuns, to the Pellegrini hospital. Just before reaching it the cart upset and the donkey ran away and took refuge in an office of the "Lotto." We have a dog story that is worthy of being put on record. On the third day of last month Mr. William Bunker of this place sent a dog to his daughter, Mrs. Delos Stebbins, of Sherman, N. Y. He was put in a crate, provided for the trip and shipped on a noon train at Williamsfield station. He changed cars at Ashtabula, Brockton and Mayville, leaving the train at Sherman and being driven, still in his crate, seven miles up the country. When released he seemed to take kindly to his surroundings, but on the tenth day of the month at noon he walked into his old home, coming from the east. He looked hale and hearty and to all appearances had enjoyed the trip and found friends by the way. Evidently he tramped his way home, as he carried no purse to pay traveling expenses.—Ashtabula (O.) Air Plows.

A V shaped contrivance, to be placed on the front of engines of fast express trains, is the latest scheme to get more speed, by overcoming much of the natural resistance of the air to the front of the locomotive. The plow extends from a few inches above the track to the top of the smokestack, the sharp edge of course in front. "Shoveling fog" is a common expression among railroad men, but plowing wind is a new thing in railroad agriculture.-English Me-

Introduction of a New Train Signal. The bell used in the roof of the locomotive cab to signal the engineer when to stop and start will soon be a thing of the past. A new air train signal is fast taking the place of the bell or gong, and already all the passenger coaches on the Lake Shore and Wabash railroads are equipped with the air signal instead of the bell. The air signal is worked by means of a small rubber or iron tube that runs under the coaches, like the air pipes to work the air brakes. In the locomotive cab there is an iron whistle, and when the conductor desires to stop the train he pulls on a short rope or lever that allows the air to escape and the whistle in the cab sounds the signal. It is claimed that this is much superior to the bell arrangement, for the reason that it works better on a long train.

The bell sometimes failed to respond on long trains, and serious accidents occurred on that account. The bellrope was also a handy thing for train robbers to cut in order to prevent an alarm while they were looting the wealth of the passengers. The other leading railroads of the country will adopt the air train signal as soon as they can get it attached to their coaches. The New York Central, Pennsylvania, Baltimore and Ohio and the Big Four are having the new system of signaling the engineer at-

Of Inhalation has only begun to be appreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfectly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s rictly logical, because natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe. Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all diseases of Throat and Lungs, succumb to the marvellous natural potency ca AERATED OXYCEN. It is

til eight months after the marriage, when organ. she was in New York. After Mr. and Mrs. Blaine returned from Europe they found their son had spent his entire allowance and was deeply in debt. It was arranged that young Blaine and his wife should go to Augusta and have their future determined at a family council. It was there proposed that the young couple should live in Mr. Blaine's old home at Augusta. Mr. Blaine was to furnish fuel, light, a man servant, a horse and carriage and \$2500 a year until young Blaine could earn that sum. Young Blaine's wife, however,

Refused to Stay in Augusta, and then young Blaine disclosed the fact that the marriage was an unhappy one and he had become estranged from his wife. During young Mr. Blaine's stay of two weeks in Augusta, says Mr. Blaine, it became potent, owing to the inharmony of the young couple, that a separation was the least disaster to be dreaded. Young Blaine accompanied his father to

Ellsworth, where Mr. Blaine was to make a campaign speech. In a few days young Blaine returned home to find that his wife had left for New York a few hours before. Mrs. Blaine, Sr., had earnestly, but in vain, urged her daughter-in-law to remain. She did not then dream that her son would not follow his wife, or that final separation would come so soon. She offered to take charge of the child, but young Mrs. Blaine declined the offer. She left a sharp note for her husband. The latter, after reading it, said he would not follow her. In forty-four days young Mrs.
Blaine returned to Augusta, with her Th mother and child. Mrs. Blaine rose from a sick bed to receive them. Mrs. Nevins and her daughter made insulting charges

against Mrs. Blaine and her son.

Mr. Blaine declares that Mrs. Blaine at Mr. Blaine declares that Mrs. Blaine at no time in thought or word or deed attempted to separate this man and his wife. "On the contrary," says the secretary, in closing, she did not fail by liberality, by consideration and by extenuation to foster in every practicable way their happiness, if happiness to them had been possible."

Irish National League Debate the County Government Bill.

A very interesting debate was held by the Irish National league Sunday evening, the subject under discussion being the "County Government Bill" as introduced into Parliament of Great Britian last week by Hon. A. J Balfour.

Mr. James Collins thought it would be an advantage to accept any concession. The Irish members should accept it on principal, amend it all they can and then vote for it.

Mr. Thomas Carroll said everybody in Ireland opposes it. In his opinion Balfour acted more manly than Gladstone, but there was nothing beneficial in the bill.

But the troubles that are to be feared have a positive remedy. Dr. Pierce's Favorite Prescription builds up and strengthens the system, and regulates and promotes every proper function. It's a generous, supporting tonic, and a quieting, soothing nervine - a legitimate medicine, not a beverage, free from alcohol and injurious drugs. It corrects and cures, safely and surely, all those delicate derangements, weaknesses, and diseases peculiar to the sex

A remedy that does cure is one that can be guaranteed. That's what the proprietors of "Favorite Prescription" think. If it doesn't give satisfaction, in every case for which it's recommended, they'll refund the money. No other medicine for women is sold on such terms. Decide for yourself whether some-

thing else sold by the dealer, is likely to be "just as good" for you to buy.

Mrs. French Sheldon. She Returns to the Country After Months of Adventure.

Mrs. French Sheldon, about whom the newspapers of two continents have been publishing strange stories for several months past, has again returned to the United States. She is an American by birth, and there is nothing in her appear ance to indicate that she likes wandering over deserts, climbing mountains, the companionship of ignorant and superstitous men and women, or any other feature of African travel; in fact there is apparently every reason to believe that she enjoys the frivolities of civilized life as well as do the women who listened with eager

A Bidddford Pastor Lectures on Rumshops as He Found Them.

BIDDEFORD, Me., Feb. 29.—Rev. William Roder, pastor of the Second Congregational church, created a sensation last night by delivering a lecture denouncing the non-enforcement of the prohibitory laws in Biddeford. Saturday night he made a tour of the saloons and drinking clubrooms about town, and in his lecture he described some of the sights he saw.

The first place he visited was a shop run by a constable. No drinking was done in there in his presence, but the place had the odor of grog about it and all the rumshop appurtenances. In another saloon the proprietor mistook the preacher for a revenue officer, and promptly produced his United States license when Mr. Rođer asked to see it. The license bore a ficti-

Of Inhalation has only begun to be apreciated by the world, and now AERATED OXYCEN furnishes the true and only illustration of the process by which such wonderful cures are being wrought. By this perfeetly natural process the respiration tract is reached to its last cell. Intensified Oxygen goes straight to where the disease is located and roots it out. It is a cure that is s rictly logical, be cause natural. The healing balsam of its vapor bathes the diseased localities with its soothing and reviving influence. The living germs that create the poison are forced to wither and die. After that they are swept out of the system, and a condition of health ensues. Color comes back to the blood and vigor to the nerves. The improvement becomes a transformation. Nature now is free to put in her finest work. She invigorates with a new life what was just now a waste caused by deadly germs. La Crippe, Catarrh, Consumption, Asthma. Hay Fever, Coughs and Colds, and, in fact, all dicases of Throat and Lungs, succumb to the maryellous natural potency ca AERATED OXYCEN. It is the new medicine of nature herself.
